COURSE XV TOURISTS
(Continued from Page 1.)

O'clock, where final instructions and details will be given. All tourists will arrive on the 3rd day of the trip. Tours will begin the morning after arrival.

ALUMNI NOTES

Dr. George E. Mat, '90, director of the Mount Wilson Observatory, Pasadena, California, has been chosen as the American representative to the International Astronomical Congress, Brussels. Dr. Hale has the distinction of carrying the position as one of the principal astronomers in America and as one of the world's most prominent solar and stellar observers. His preliminary training in physics and astronomy at the Harvard University qualified him for a position of pre-eminence in astro-physics which includes the directorship of the famous Yerkes Observatory. Few men in the United States have had so many honors conferred upon them by European and American scientific societies as Dr. Hale.

Edward A. Clark, '90, an authority on gold-mining, died at his home on Commonwealth avenue, Boston, Wednesday, from a severe attack of bronchitis. Mr. Clark was 74 years old at the time of his death. Mr. Clark has been prominently identified with many mining enterprises in both the United States and Canada. He had reopened many mines, the latest before the Carlin Hill Gold Mines Company. He was a member of the Algonquin Club, the Country and Automobile Clubs, besides a number of local and national scientific organizations.

UP TO DATE

OPEN REGISTRATION
FOR R. O. T. C. DANCE
(Continued from Page 1.)
The rules gave the vote to all men wishing to win the right of admission, and as to the eligibility of those winning the T instead, this has been corrected by assuming that all T winners have won for the minor letter also.

Although action could not be taken, there was an informal discussion of ideas on the work on the new house. It is planned to enlarge it by the addition of two wings, to go away from the present central stairway, and to arrange in such a way that it can be used as a club house for the junior class in the summer season, and as a club house and meeting rooms of the adjacent land, planting of grass, trees, etc., and to furnish or furnish the whole building.

WILL PURCHASE CUPS
FOR RECORD HOLDERS
(Continued from Page 1.)

Here's why
CAMELS are
the quality cigarette

Because we put the utmost quality into this one brand. CAMELS are as good as it's possible for skill, money and lifelong knowledge of fine tobaccos to make a cigarette.

Nothing is too good for CAMELS. And bear this in mind! Everything is done to make CAMELS the best cigarette it's possible to buy. Nothing is done simply for show.

Take the Camel package for instance. It's the most perfect packing science can devise to protect cigarettes and keep them fresh. Heavy paper—secure foil wrapping—revenue stamp to seal the fold and make the package air-tight. But there's nothing flashy about it. You'll find no extra wrappers. No frills or furbelows.

Such things do not improve the smoke any more than premiums or coupons. And remember—you must pay their extra cost or get lower quality.

If you want the smoothest, mellowest, mildest cigarette you can imagine—and one entirely free from cigarette aftertaste. It's CAMELS for you.
