the make do for the19, leseme 10 ty pe.

The constitution of the club provides that each member get a corn of lint, and a shewter, of shaving is one of the prities, and the use of any tu be, baldachin, care. Stringent penalties are to be meted out to those who break these laws.

The Student Tours Will Cross East.

The Colorado Aggie’s delegation will sail from New York City on a Friday in March, and will match their oratorical and debate skills with the students at Harvard, Yale, and Princeton. They will attend the Pi Kappa Delta debate at Harvard, and the debate at Princeton, where they will be judged by a panel of distinguished judges from the Simpson College, Indiana University.

Abolish Bowdon Class Societies.

The group of societys at Bowdon are to be abolished at the end of this year. The reason for this action is that the groups have been found to be competing and using questionable methods. A special committee is now at work drawing up plans for a society that will be purely honorary with no competition.

SUMMER TOURS FOR COLLEGE STUDENTS

(Continued on Page 2.)

It will be the task of the rush of representative students, those who have more or less taken a leading part in the intellectual and cultural life of the campus, to succeed in the belief that nothing contributes more generously to the intellectual and to an intelligent interest in intercollegiate life than a contact with the larger world and a personal acquaintance with the makers of the traditions, the resources, and the problems of the world, which, taken together, make up national character and interests, and influence international events. The underlying purpose of the Students’ Tours has been to aid, by one of a number of symposiums, in an effort to mobilize the individual.

It is my belief that no factor in international peace counts more for the future of the world than the understanding of the peoples, among them Stratford-on-Avon, Kenilworth, Melrose and Edinburgh, and the environs of London. The tour is a trip through the heart of the Scotch Highlands. They will spend three days in a coaching-trip through North Wales, and will visit the great cities of ancient and modern France. They will attend the South of France, and will spend a week walking through the less known parts of the Riviera, and will visit several of the great cathedral cities of Italy, staying a brief stay in Rome, Lyon, and Paris. The students will have the opportunity to be guided by professional artists and to be trained as a group.

AEROS BUILD NEW GLIDER

(Continued from Page 1.)

A new high of 50,000 feet is planned for the students’ trip to Italy in 1922. The trip will be made by Robert H. Smith, Massachusetts Institute of Technology, under the supervision of the Aeronautical Engineering Department. The trip was made by Robert H. Smith, Massachusetts Institute of Technology, under the supervision of the Aeronautical Engineering Department.

1200 Massachusetts Avenue
Cambridge, Mass.

Call at any time.

R. E. MAX KEEZER.

Do not sell to Men on The Streets.

Discrimination

Who can discriminate more carefully than the college man? To his natural equipment he adds the resources of culture and the association with great minds of all ages. Such discrimination leads naturally to the choice of Melachrino, the One Cigarette that succeeded the World Over.
