

ENGINEER TRACK MEN COMMENCE SEASON'S TRAINING ON GINDERS

Tech Field Scene of Varied Activity as Large Squad Reports

MANY NEW CANDIDATES SIGN UP FOR WORK

Weights and High Hurdles Weakest Events on Beaver List

The last two days have seen Tech Field come to life with a vengeance after being deserted all winter. About 200 budding athletes began training for their various events, Wednesday afternoon, and yesterday saw no let-up in the activity. Technology has lost a number of last year's veteran stars but if there is any material at all left the numbers seeking to fill their places should bring it to light. Coach Kanaly's call for men in the field events was answered at once, though most of the aspirants who reported are raw men and will have to be trained for their work.

Candidates Flock to Field Events

The new event in intercollegiate competition, the javelin throw, has received the most attention from the new candidates, having fully a dozen men daily attempting to outdo the ancient Greeks with their own weapon. George Boli appears to outstrip all rivals with his spear work but he is the only one who has had experience. Among those who are just beginning, Guild Holt, of last fall's cross-country team, shows the most promise, though he has not done sufficient work as yet to determine his real abilities.

The broad jump has eight men out and several candidates have also reported for the high jump and the pole vault, so that there are possibilities of developing stars to replace those who will be lost after this season. Morris Sheldon and Phil Stearns, both veterans and point winners in the New England last year, are holding down the pole vault very ably at present and can be counted on to repeat their past performances in coming meets.

Veterans Left in Jumps

Ed Merrill and Greenough will keep on clearing the bar for the Engineers in the high jump unless some of the novices show unexpected class. Ed has been competing during the winter in the various meets and has appeared to advantage, so that it is to be hoped that he will be in top form for spring competition.

The broad jump has Dippel, Prescott, and Heap among varsity prospects, as well as five or six men out
(Continued on Page 3.)

MOTOR TORN DOWN AND REBUILT IN RECORD TIME

Many Forced to Stand in Desire to See Demonstration

A bare 38 minutes was required to take apart and reassemble the motor of a Marmon 34, Tuesday afternoon in 10-250. The room was filled to capacity with members of the Faculty, students, and friends, who had availed themselves of the opportunity offered to the Institute by the Marmon Motor Car Company to witness the spectacle.

Mr. Peterson of the Company gave a short talk before the actual experiment was begun. He stated that the purpose of the exhibition was to demonstrate how well the Company had lived up to its ideal of making the Marmon motor car a dependable and economical method of transportation. While the two men clad in white from head to toe, were busily engaged in tearing down and building up the motor, Mr. Peterson explained the workings of the motor. The ease with which the men completed the task and the celerity of completion attested to the simplicity, the accessibility, and quality of workmanship of the motor. The clean-cut appearance, the fine adjustment, and the lubrication system were a few of the points stressed in the talk.

CHRISTIAN ASSOCIATIONS ASSEMBLE AT DARTMOUTH

F. H. Frazier '23, Will Represent Technology at Hanover

The Dartmouth College Conference, to which many colleges are sending delegates, is to be held on March 24 and 25, under the auspices of the Dartmouth Christian Association, at Hanover.

There are to be talks and round table discussions on various subjects which are of interest to the Christian Associations of the seven or more colleges which will be represented. The Conference will open on Friday at the Moose Mountain Cabin, with a banquet, followed by a discussion of "The Outlook for the Christian Professions in the Colleges," with Rev. Roy B. Chamberlain, of Hanover, as leader.

Saturday morning, Rev. A. Carl Skinner, of Canaan, Conn., will lead in a round table discussion on the Ministry; and later there will be a discussion of Association Work, with Mr. Clifford K. Brown, of the Boston "Y," as leader. Saturday afternoon there will be a discussion of "Opportunities for Service in the Foreign Field," with Rev. W. T. Locke, of China. This will be followed by a chance for sightseeing about Hanover.

Seven Colleges to Attend

The closing meeting of the Conference will be held on Saturday evening, at which Rev. John Dallas, of Hanover, will speak on "How Can We Get More of the Christian Men of the Colleges to Recognize and Accept the Challenge for Service in the Christian Professions?" R. H. Frazier '23, Director of Bible Study, on the T. C. A. Cabinet, is to be the delegate from Technology to the Conference.

The Dartmouth Christian Association announces that the following colleges have accepted their invitation to the Conference: Technology, Harvard, New Hampshire State, University of Vermont, McGill, Norwich, and Amherst. They also expect representatives from Williams, Y. M. C. A. College, Trinity, and Middlebury.

ALUMNI COUNCIL AND FACULTY WILL DINE

"Use of Psychology Tests" Will be Subject for Discussion

AUTHORITIES WILL SPEAK

The Faculty Club and the Alumni Council will hold a joint meeting and a dinner on Monday evening, March 27, at 6:30 o'clock, in north hall, Walker. The subject for discussion is "The Use of Psychological Tests." The speakers will be Henry T. Moore, professor of Psychology at Dartmouth, and Wallace B. Donham, Dean of Harvard School of Business Administration.

The object of the meeting is to afford an opportunity for members of the Faculty to meet the members of the Alumni Council and for the discussion of work actually being accomplished by psychology tests. The speeches will immediately follow the dinner, but those who prefer not to join the meeting for dinner may come later and find ample provision for their attendance. It has been announced that the dinner will not exceed \$1 in price. Professor Tyler has also invited the members of the faculty of Harvard, Tufts, and Boston University.

Professor Moore Pioneer in Field

Professor Moore has done pioneer work in the field of "personal ratings" of individuals, both of college students and prospective employees. Some very interesting results have been obtained at the Harvard School of Business Administration and Dean Donham is thoroughly familiar with this work.

U. OF P. VOTES ON FINALS

The University of Pennsylvania is conducting a straw vote to determine the attitude of undergrads on the subject of final examinations. Final examinations have been abolished in the Wharton School, and if the student vote goes strongly against them, the chances are that they will be eliminated throughout the entire University.

MASONS WILL DANCE IN WALKER TONIGHT

Few Remaining Tickets May be Obtained from Members of Committee

This evening the Masons of Technology and their friends will dance in the main hall of Walker. The dance will be informal, and the tickets cost \$2. A few tickets remain unsold, and they may be obtained from the members of the committee. The dance, though run by the Masons, is not restricted to Masons, and all in the Institute are cordially invited to attend. Kellar's orchestra will furnish the music for the dancing.

The patrons and patronesses will be Professor and Mrs. F. Vogel, and Professor and Mrs. W. H. Timbe. The committee in charge of the affair, and from whom may be obtained the remaining tickets, is: H. F. Simonds '24, chairman; P. D. Appel '22, S. H. Brown '24, P. C. Drickson '23, E. R. Hubbard '22, H. B. MacIntyre '22, L. MacKenzie '22, and, in the Rogers building, C. E. Lord '23. Tickets may also be obtained at the door.

GIRLS NUMBER VOO DOO COMPLETELY SOLD OUT

Prom Number to Appear First of Junior Week

The Girls' Number of Voo Doo is completely sold out. Not a copy is left in the hands of the Circulation Department, although a few are obtainable at the Co-operative store, the dining room of Walker, and some of the news stands.

The Managing Board announces that the issue has been the most successful one yet published, from any point of view. The Newspaper, for merely the high water mark in circulation, was far surpassed, and the 4,500 copies which were printed went literally like hot cakes.

Membership in the Woopgaroo Society was awarded to Miss Ruthie Barcher of New York for literary work, and to Miss Catherine Spencer of Smith College for art. Honorable mention for art work was given to Miss Margaret Perley of the New School of Design, who submitted the cover design.

In spite of the new record now set by the Girls' Number, the Managing Board expects it to be eclipsed by the coming Prom Number. This issue is due the first part of Junior Week. A large amount of material is now on hand and the issue is to be much larger than usual. The Girls' Number was four pages oversize. The Prom Number will probably be 16 pages oversize.

The Managing Board announces the election to the staff of Voo Doo of A. K. Sparrow '24, and E. L. Scharnikow '24, as business associates.

CHORALS FIRST OFFICIAL MEETING HELD TONIGHT

Society Established on Par with Rest of Activities

Tonight will be the first organization meeting of the Choral Society this year. Much is expected to be accomplished by the men in charge as this meeting marks the result of much effort on their part to establish the Choral Society on an equal basis with the rest of the Institute student activities. Following the meeting, the regular rehearsal will continue as usual. A record of the affairs of the club will be kept from now on, including the attendance of the members, which has not been kept in the past.

Songs Well Liked by Members

The rehearsal will start immediately after the meeting, which is scheduled to commence at 7:15 o'clock tonight. They will be held hereafter regularly on Friday nights. During the past term a variety of songs have been tried and have been well liked by the members of the society. They are adapted to men's voices and can be sung without difficulty by nearly all students. Up to the present time nearly 150 men have interested themselves in the society. Mr. Stephen S. Townsend, a noted choral master, who has been with the society since its beginning, has spent much time on the society.

A. U. U. READY TO HELP TRAVELLING STUDENTS

The following letter has been received from the Dean:

To the Editor of THE TECH:
A letter has just been received from Mr. George E. MacLean, Director of the American University Union in Europe (of which the Institute was one of the charter members, and is now a supporter) asking me to bring the Union to the attention of students who may be expecting to visit Europe.

The Union is closely associated with institutions and enterprises throughout Europe which are of special interest to visiting students. They also have lists of lodging and boarding places. They express the hope that students will register at their headquarters, 50 Russell Square, London, and allow them to be helpful in any way within their power.

The office of the Continental Division of the Union is 1 Rue de Fleurus, Paris.

(Signed) H. P. TALBOT,
Acting Dean.

In view of the fact that there are quite a number of student tours to be conducted in various parts of Europe during the coming summer, the above letter was sent to THE TECH in the interests of the undergraduates who may be planning to take any of them. The American University Union is prepared to help students in finding lodgings while in Europe and wishes to aid them in any way possible.

BOOKS WANTED BY T. C. A.

The used-book department of the T. C. A. announces that men whose books have been sold through the exchange will receive the money for them next week. The time has not yet been definitely set, but will be announced later.

There are several books which are greatly in demand, and they can be disposed of immediately if brought to the office in Walker. The list is as follows:

Tables of Integrals, Hudson and Lipka
Elements of Electrical Engineering, Hudson
Applied Mechanics, Fuller and Johnson
Hydraulics, Russell
Elements of Mechanism, Schwamb, Merrill, and James.

Books may be obtained at the T. C. A. for two-thirds the list price, thus making it advantageous for buyers to patronize this store, and enabling those who wish to dispose of their books.

TWENTY VACANCIES TO BE FILLED IN T.E.N.

Meeting of Candidates Will be Called Today at 5 O'Clock

WILL BANQUET THURSDAY

The Tech Engineering News has practically doubled its business and editorial content during the past year, as announced by its Managing Board. Plans are being made so that the magazine will be able to double again during the new year just starting.

This increase in business has been steadily requiring an increase in staff. At the present time, there are 55 men on the staff and 20 vacancies which are to be filled by the competition beginning today. It is expected that the planned increase in size of the business will make new openings for candidates. As the need for new men is so great, the management believes that a fine opportunity is offered for upperclassmen to make good positions.

All candidates should meet at 5 o'clock today in The Tech Engineering News office, room 27A Walker Memorial, at which time members of the Managing Board will explain the various phases of the T. E. N. and will start the candidates on their new work. A convocation of the staff is held weekly to discuss matters which concern the paper and at which an opportunity is given for the candidates to get acquainted with the other men working on the paper.

There will be no subscription shagging or ad chasing except for those who try out for these departments. Men will be given voice in management.

SHERWOOD EDDY TO ADDRESS STUDENTS AND FACULTY TODAY

Comes from Maine Colleges to Speak Before Students of Boston

PRACTICAL RELIGION IS BASIS OF LECTURE

Material and Subject will be Different from Last Year's Lectures

Sherwood Eddy, the well known lecturer, will give an address to the students and Faculty of the Institute today at 4 o'clock in room 10-250. The meeting will be held under the aus-

DR. G. SHERWOOD EDDY
Who Will Speak in 10-250 Today

pieces of the T. C. A. Meetings Committee, of which C. H. Hubbard '23, is chairman. The committee is to be congratulated on having obtained the services of Mr. Eddy, as he is to be in Boston for but a short time.

His address will be on "Present Day Problems in America," and will last about one hour, and at the end of the address the students will have an opportunity to ask such questions as they may desire.

Eddy Engaged in Europe

Mr. Eddy has been engaged in active Christian work since 1896, and has seen all parts of the world. On his last voyage, made since the war, his work carried him to eighteen different nations, including Russia and the Central European countries. From these countries he has gathered material which is particularly interesting to us at the present time, and from which he selects the topics for his addresses on present social and industrial unrest.

He is an authority on labor problems and is called into consultation by statesmen all over the world. Because of his wide experience and knowledge of these conditions Mr. Eddy is particularly fitted for the work
(Continued on Page 4.)

REGISTRAR SENDS OUT EXAM REPORTS TODAY

The formal marks given as records for the second term are being sent out today. They will be mailed to the students today, and differ from last year's second term reports in that they include records based on the final examinations held last week. Last year no formal examinations were given until June, thereby throwing the

CALENDAR

Friday, March 24
4:00—Sherwood Eddy speaks in room 10-250.
