Final Varsity Crew Schedule
 April 29—Annapolis at Annapolis—First and Junior Varsities.
 May 6—Union Boat Club on the Charles—First Varsity.
 Yale at New Haven—Junior Varsity.
 May 13—Harvard on the Charles—First and Junior Varsities.
 May 20—Columbia on the Harlem—First and Junior Varsities.

The Harvard crew is in for a tough start this season. Its first race is with Pennsylvania, which gets into shape early. Then follow races with Annapolis and Princeton, two crews of no mean order. The race with Technology is scheduled for May 13.

The Exeter Academy Athletic Association treasurer reports a loss of \$268.65 in conducting athletics last year. Basketball was the only paying sport, the others losing from \$800 to \$1800 each. It has been suggested to raise the student tax to \$20 a year.

DORM PORTER ARRESTED IN ROXBURY SHOOTING

Alfred Myrie, a porter at the Technology dormitories was arrested early yesterday morning and arraigned before the Roxbury criminal court on the charge of murder as a result of a shooting that occurred late yesterday in his home in Roxbury.

Myrie, who lives at 747 Shawmut Ave., Roxbury, became involved in a quarrel early in the evening which ended in his drawing a revolver and firing the bullet which ended his wife's life. The shooting occurred about 12:15, and the woman died about a half hour later in the receiving hospital to which she was rushed immediately after the fatal occurrence. Myrie was taken into custody shortly afterward and placed in a cell to await his trial. The incident was witnessed by one G. A. Bagiste. Myrie was employed at odd jobs around the dormitories.

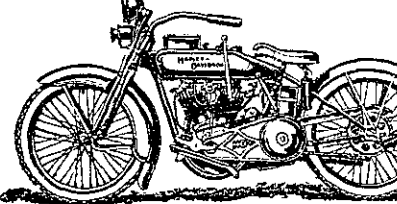

WORK ON TENNIS COURTS WILL SOON BE FINISHED

Owing to the inclement weather the work begun in preparing the tennis courts for spring and summer use has been temporarily stopped. The majority of the courts are now in fair condition. The ground has been raked and rolled wherever needed and new wire will be put around the old courts. With the completion of these minor details the courts will be ready for use as soon as good weather sets in.

Freshman crew candidates are to report to the M. I. T. A. A. office after 5 o'clock or to the Boathouse.

The Swimming Team will hold a banquet Wednesday evening at the Hotel Lenox for all men who were in any way connected with the team. Subscription is \$2 per plate.

Opening Tennis Meeting at 5 o'clock in room 10-275.

NEW RADIO COLUMN IN BOSTON PAPER

E. L. Bowles Edits Transcript Wireless News

The first radio article by Mr. E. L. Bowles of the Electrical Engineering Department appeared in Monday's issue of the Boston Transcript. The articles which appear daily are of interest to the numerous new operators of radio phones.

Makes Two Divisions

Radio furnishes forms of amusement and education to the two groups into which Mr. Bowles divides those interested in the subject: novices and experienced amateurs. The column will be conducted for both these groups. The novice is introduced to the subject with the aid of a well-known illustration. The different forms of waves are treated in detail and an understanding is gained from comparison with water waves. The transition from waves in water to waves in the ether is set forth. The first problem which confronts the radio pupil is the production of wireless signals. A paragraph is devoted to radio clubs and the need of co-operation between all users of radio apparatus. The simple elements of a radio station are described.

For the advanced amateur an introduction to the purposes and aims of their column is set forth. A few radio terms are explained and the list of broadcasts for the evening is given.

HARVARD AND TECHNOLOGY CHEMICAL MEET TONIGHT

A meeting of the Harvard-Technology Chemical Club will be held tonight at 8:00 o'clock, at the American Academy of Arts and Sciences, 28 Newbury St., Boston. The feature of the evening will be the talks by Professor Franklin of the Physics Department and Mr. S. L. Chisholm. The former will speak on "The Significance of the Statistical Method in the Physical Sciences."

SOCCKER FIELD MAY SUPPLANT CINDERS

One of the interesting developments of the demand, by soccer players, for more space, is the official proposition that the cinders in back of building 10 be covered with ground and a playing field established there. At present, as a member of the administrative division has pointed out, the spot contributes a great deal of dust and unsightliness. The plans call for this part of the campus to be kept in lawn and Captain Macorra says the idea of a special field for soccer is being met with a great deal of approval by his team. The chief difficulty seems to be the rather high expense.

TECH MEN ARE INVITED TO Y. W. C. A. DANCE TONIGHT

Y. W. C. A. Dance is to be held tonight at 40 Berkeley Street, at 8 o'clock. About twenty Institute men are invited and all who wish to go are asked to leave their names at the T. C. A. office as soon as possible.

This is one of a number of such dances which are held about once a month and, from the reports of those who have attended previous ones, a good time seems assured.

Sophomore Nine Kept Hustling by Coach Sherman

The Sophomore baseball uniforms have been adorning the first diamond since the early part of the week, the men getting in some snappy practice under the direction of Don Sherman, who has volunteered his services to the team. Sherman is wasting no time in getting the men started as the first game is rapidly approaching. The majority of the players came out for the first time on Tuesday, although the battery candidates have been out for about two weeks. While the weather has not been at all favorable to ball playing, the men have shown a good deal of enthusiasm, everybody contributing to make the practice sessions as snappy as possible.

Sophs Still Seeking Recognition

The Sophomore team, while it has the material and spirit necessary for a first class team, and also has the services of the best coach obtainable, is working under a great handicap due to lack of definite assurance that they will be recognized by the M. I. T. A. A. The small amount of equipment which they have been able to gather from various sources is wholly inadequate when two teams of 1924 men are anxious to get on the field, and with the first game, that with Andover on April 15, drawing near, some sort of support is necessary. The managerial competition which was to have been included in the program outlined by the M. I. T. A. A. is also unrealized, which is another handicap to the team.

Team Working Hard to Come Through

The present Sophomore team is doing its best to break the old precedent of having athletics provided for the first year class only, and a great deal of work has been done by the men promoting it. The large number of men who have reported for Sophomore practice seems to be an indication of a strong spirit in favor of baseball for the upper classes, and if this year's team can come through, the men promise that baseball will be at the service of all the classes.

COLLEGE SPORTS

After holding the Eastern Intercollegiate Basketball title for four years the Pennsylvania basketball team met defeat at Princeton last Tuesday night to the tune of 28 to 23. The Tigers took the lead from the start and were never headed by the Quakers throughout the entire game.

In spite of the results of last Saturday's Intercollegiate Swimming meet, in which the Yale team emerged the victor, the Annapolis swimmers have issued a challenge to the Yale team, which the latter has accepted. The Midshipmen believe they can defeat the Intercollegiate champions.

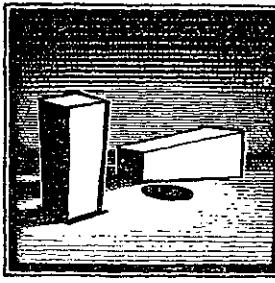

The Yale gym team closed its home schedule last Saturday with a 34½ to a 19½ win over the Harvard gymnasts. Dole won Harvard's only first, in the tumbling event. Yale and the crimson are both entered for the Intercollegiate meet in Walker Gym, which comes on March 31.

Last Monday saw the beginning of the outdoor track season for the Boston College men. Boston College recognizes the importance of strength in the field events, if it is to offer competition to Technology in the New England Intercollegiate, and the athletes are giving these events close attention. In the pole vault especially, there is a need of men.

Gauss of Yale did the unexpected, when he nosed out Damon of Amherst in the 50-yard dash at the Intercollegiate swimming meet at Philadelphia. Davy Jones of Brown was there too, in the 100-yard dash, winning by a yard after overcoming a lead. Lack of funds prevented the Technology men from participating in this meet.

The University of Illinois won the annual Conference Indoor Track and Field Meet at Evanston on March 20. Wisconsin took second place. Records were broken in the 880, the 2-mile run and the 50-yard dash.

Square Square Pegs in Round Holes
 NOWADAYS every progressive organization does its utmost to prevent square pegs from being in round holes. We try to fit the man to the job and the job to the man so that the man can do his best work and advance most rapidly and the job will be well done.
 Telephone work has many phases. The list of activities in which your talent may find full opportunity for recognition is long — research, invention, manufacturing, buying, selling, operation, maintenance — there is sure to be a place for the man who is capable.
 Hundreds of Technology men are now making their marks in this great field. Perhaps you, too, will decide to enter it after you have studied its opportunities and talked with the Bell telephone men who will be at Tech on April 3rd, 4th and 5th.
