

CATHOLIC CLUB HOLD COMMUNION BREAKFAST

Will Announce Plans for Next Year's Officers

Next Sunday morning at the 9 o'clock mass at the Cathedral of the Holy Cross, the Technology Catholic Club will receive Lenten Communion in a body. This function is an annual event in the calendar of the Club. After the service a breakfast will be served to the members in the Cathedral School Hall. Mr. Edward Joyce, LL.D., will address the Club on the subject, "The Dangers of Present Day Legislation."

The Board of Directors will meet on Friday at 5 o'clock to discuss plans for the election of officers for the coming year and these arrangements will be announced at the breakfast.

W. E. LEE SPEAKS TO CHEMICALS AT SMOKER

Society Nominations Due Before Tomorrow Noon in Room 3-312

The fact that all seek good health and that since the beginning of history light was recognized as possessing health-giving properties was the first point stressed by Dr. Wesley T. Lee in his talk before more than fifty members of the Chemical Society at their smoker held in the main hall of Walker, Wednesday evening. The desire to find the rays in sunlight which possessed this therapeutic property lead to the study of the ultra-violet ray and the x-ray. The discovery of radium by Mme. Curie and the subsequent history of the precious metal were treated briefly.

The members were reminded to have all nominations in by tomorrow, at 1 o'clock. All nominees for president should be from the Class of 1923 while other nominees may be from either the Class of 1923 or 1924. Elections will be held a week from today in front of Dr. Norris' office, from 9 until 5 o'clock.

RECEIVE TECH SHOW APPLICATIONS TODAY
(Continued from Page 1.)

J. D. Cochrane '23, was in the Y. M. C. A. Follies last year and he has also taken the part of Mark Anthony in a Shakespearean play.

M. G. Davis '25, has a great deal of experience in minstrels and for several summers has played important parts in amateur productions at pleasure resorts.

Helmer McIntosh '25, who takes a girl's part in "The Wrong Steer" has had previous experience in female impersonation. Those who heard the Musical Club concerts last year will remember Preston Woodling '23, who plays a prominent part.

STARS GET SHINGLES FROM ADVISORY COUNCIL
(Continued from Page 1)

but I think I can help Harvard too. Of course the goal of all Crimson activity is the Yale race so if Technology beats Harvard or presses her hard it is going to be a real service to the university fellows. In that way I feel that in serving the Institute to the best of my ability I will also be helping my old school defeat the Blue."

Make Boathouse Student Center
Dr. Rowe continued the subject of crew with a short summary of the conditions as they now are. The club house is definitely the property of the Corporation and full payment has been made. The Metropolitan Park Commission has offered the use of a two hundred yard river frontage on each side of the house so that extensive alterations may be made.

Present plans call for the construction of additional wings, and the rearrangement of the second floor to provide for a large general room to be furnished with comfortable chairs, tables and lounges. The balcony will be glazed in to provide a sun parlor for winter use. Wings will be one story high and have roofs of concrete which will be equipped with awnings and used as piazzas.

Every effort is to be made to interest the student body in the club house. A complete heating system is planned so it may be used as a center for activities all the year round. A house committee will have charge of all business.

The equipment on hand consists of five eight-oared and three four-oared shells as well as several singles. A new shell costs about \$850 and can be made for half that amount so the suggestion that boats be made under the supervision of the Naval Architecture Department is being seriously considered. This idea is going strong in

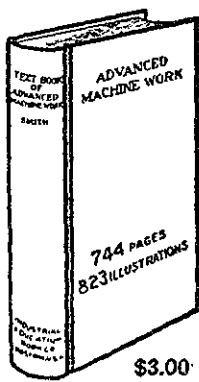

several colleges and good results have been obtained.

Boxing Team Receives Insignia
Members of the boxing team who fought in two-thirds of the meets were awarded BTT. The following men received letters: A. E. Lindsey '24, R. C. Smith '24, L. R. Phillips '24, E. H. Moll '24, F. J. Horgan '22, J. H. Scholtz '23, and J. C. Nowell, Jr., '23.

It was voted that all men receiving letters for services other than actual competition be required to wear a bar beneath the insignia to distinguish it from that received by active athletes. This applies to the managers of all teams.

The custom of presenting cups to holders of Technology track records will be revived this year and awards will be made at the same time that the usual letter shingles are distributed. A special committee of the M. I. T. A. A. will handle the details.

A LIBERAL EDUCATION IN MACHINE SHOP PRACTICE
ADVANCED MACHINE WORK
By Robert H. Smith
Massachusetts Institute of Technology
Sixth Edition Revised and Enlarged

A BOOK that has revolutionized teaching and learning Machine Work.
It is used in Colleges, Technical, Apprentice and Vocational Schools, and Machine Shops.

Why Not Learn To Fly?

If you cannot fly an airplane, but have ever entertained a desire to do so, this message should be of intense interest to you. Especially is this true of students in Airplane Engineering—for flying instruction is a distinct aid in airplane design.

LEARN TO FLY THIS SUMMER DURING VACATION

Aviation is here to stay—and it has a future even brighter than many imagine. Already greater strides are being made than most people are aware. Our training of pilots, which was discontinued on America's entrance into the late war, has been resumed—and with facilities such as were never before known. It will be great sport for Tech students to learn to fly this summer.

Send for Booklet if interested

If the above thoughts appeal to you, address our School Department, No. 2, for further information. There will be no obligation at all and we have a complete new booklet on this particular subject which is free for the asking. Even if you should decide you would not care for it for yourself, why not send for it for some one else?

TIREX (ALL RUBBER) PORTABLE CORD

A large proportion of portable tool troubles are cord failures. TIREX wears longer than other cords and keeps the tools in operation. It always comes back from one job ready for the next and stays in service, without repairs, more than four times as long as fibrous covered cords.

Everything for QUALITY—nothing for show

THAT'S OUR IDEA in making **CAMELS**—the Quality Cigarette.

Why, just buy Camels and look at the package! It's the best packing science has devised to keep cigarettes fresh and full flavored for your taste. Heavy paper outside—secure foil wrapping inside and the revenue stamp over the end to seal the package and keep it air-tight.

And note this! There's nothing flashy about the Camel package. No extra wrappings that do not improve the smoke. Not a cent of needless expense that must come out of the quality of the tobacco.

Camels wonderful and exclusive Quality wins on merit alone.

Because, men smoke Camels who want the taste and fragrance of the finest tobaccos, expertly blended. Men smoke Camels for Camels smooth, refreshing mildness and their freedom from cigaretty aftertaste.

Camels are made for men who think for themselves.

Camel
