THE TECH, 1st Floor, 3rd Street.

THE TECH is a student publication of the Massachusetts Institute of Technology. Published twice a week, Monday and Thursday, by the students of the Institute, the TECH claims no authoritative pretensions.

THE TECH ENGINEERING NEWS

IN THE THECH:

To the Editor of THE TECH:

As always, an admitted (practical) joke is the story that is getting around among the students. A member of the Class of 1923, said their first love is the Alumni Association, and that his true love is the Alumni Association. This was the effort of one of the young men who made a campaign for more students to join the Alumni Association. We take it that the class will not be doing anything to prevent this, and that the effort will be in the right direction. The Class of 1923 apparently has made a start on the way of the records of the Class of 72 by having a selective group of students of the Alumni Association. This was the effort of one of the young men who made a campaign for more students to join the Alumni Association.
