

BOB HENDRIE AND ELMER SANBORN FIGHT GAMELY IN I. C. A. A. A. RACES

INSTITUTE GOLF TEAM DEFEATED BY YALE, 8 TO 0

MacMahon of Yale Covers Woodland Course with 76 Strokes

The Technology golfers failed to score against Yale on the Woodland course Saturday morning. Jonathan Ballard being the only Engineer who was not defeated by his Eli adversary. Ballard earned an even break with Buffington, the pair finishing all square. The score was 8 to 0.

McMahon won his match with Abbot Johnson, of the Institute, three up and two to go. He was in better form than any of the other golfers and required only 76 strokes to complete his round of the course. The Cardinal and Gray captain, Henry Schley, lost to Lovell, also three up and two to go. Yale rather had its own way in the four ball games, though the contest between Lovell and Buffington, for Yale, and Schley and Ballard, for Technology was well played and quite interesting. The University has a strong team and is expected to rank high in the intercollegiate on Long Island next month. The score:

YALE	TECHNOLOGY
Lovell (3-2) 1	Schley 0
Buffington 0	Ballard 0
McMahon (3-2) 1	Johnson 0
Ledbetter (4-3) 1	Clement 0
Woodruff (5-4) 1	Harris 0
McLaughlin (6-5) 1	Conant 0
Lovell-Buffington (2 up) 1	Schley-Ballard 0
McMahon-Ledbetter (3-1) 1	Johnson-Clement 0
Woodruff-McLaughlin (6-4) 1	Harris-Conant 0
Total 8	Total 0

Freshman Nine Evens Series at Two Games All by Treating Soph Ballplayers to 11-4 Trouncing

In two busy innings, the fifth and the seventh, the freshman ballplayers scored nine runs, which would have been more than plenty to trample the Sophomore team to defeat in the fourth game of the interclass series on Tech diamond Saturday afternoon. With the help of the single tallies manufactured in the second and sixth innings the frosh took the contest, 11 to 4, and made a fifth game necessary to settle the championship.

Guy Canfield, Sophomore pitcher got into hot water in the second inning, yielding two hits, but it was not until the fifth that the freshmen really began to bombard him severely. Five hits sent three frosh runs across the plate and sewed up the game for Captain Carrier's nine. Just for luck the '25 batters went on the war path in the seventh inning and put together four hits and two errors for five more tallies.

First Inning Quiet

Cook was the first man to face Canfield and he struck out. Brown followed him to the plate and also to the bench after three futile swings. Phil Carrier connected but Robinson relayed his drive to first for the final out. The Sophomores were almost as peaceable in their half. Manning, of home run fame, was retired on strikes and Michelena fied out to Cook. Clarke got the first hit of the contest, a pippin of a two bagger, but Walters popped one to third baseman Balcom. Dave Peene, clean up man in the frosh batting order, who has been getting solid hits regularly this spring, dropped a fly in the right fielder's

Score by Innings: 1 2 3 4 5 6 7 8 9
 Freshmen 0 1 0 0 4 1 5 0 0—11
 Sophomores 0 0 0 0 2 0 1 0 1—4
 Score—Freshmen 11, Sophomores 4.
 Substitutions—Clarke for Canfield in the eighth. Bates to 3b. Three base hits—Simmons, Chapin, Michelena. Two base hit—Clarke. Bases on balls—off Canfield none; off Clarke 1; off Wheeler 1. Struck out—by Canfield 7, by Clarke 1, by Wheeler 3. Stolen bases—Michelena 2, Robinson, Walters, Clarke, Lumb, Simmonds, Balcom, Peene, Cook.

hands for the opening event of the second frame. Balcom singled to left, and Simmonds came to bat. Canfield grooved one and the frosh slammed it for a lusty three base hit which sent in Balcom with the first count. With only one out, things didn't look so pleasant to the Sophs but Guy turned both Ingram and Lumb into strike out victims and was safe. The '24 players went down in one, two, three order. Robertson fied to Cook, in left field, Bates grounded out to short stop Brown and Robinson waited one to Ingram in the right garden.

In the third, Pitcher Wheeler got a hit but was forced at second when Cook rolled one to Canfield. Brown gave Cook some of his own medicine forcing him at second by his hit to Manning. Carrier poled out a hit to right field but Brown was too anxious and was nipped at third by Earle Bates' nice throw.

In the '24 share of the inning Chapin was retired on his bunt to the pitcher, Canning hit safely but was caught trying to steal second and Manning was the third out on a smack to Carrier.

Simmonds got his second hit for the frosh in the fourth, after Peene was out on a fly and Balcom had struck out. Ingram again struck out and so the run column was still blank. The '24 batters furnished a little more excitement, Michelena getting around to third on errors and a hit by Clarke. He was put out on Robinson's drive to the infield however, and after Robb had stolen second Bates was thrown out at first by Carrier.

Three Freshmen Hit Doubles
 The excitement in the fifth inning opened with a hit by Lumb. Wheeler struck out. The catcher scored on Cook's wallop and then there came a shower of doubles. Brown, Carrier, and Peene contributed. Three more runs were added before Canfield tightened and the best Balcom and Simmonds could do was fly out to Clarke. Meanwhile Peene had pilfered third but he was left there.

The Sophomore ballplayers came back with two runs, brought in by Robinson and Chapin. Robinson got on through an error and Chapin's triple advanced him to the plate. Canfield was put out but Manning brought Chapin in with run number two. Manning was caught at second, which was tough since Michelena followed him with the second triple of the inning. Clarke popped one to Carrier.

The freshmen sent in Eager for Ingram and he got to first on an error in the sixth. Lumb's hit scored him. Walters, Bates and Robertson were

the Soph batters but they failed to cause Wheeler any trouble.

In the seventh inning the freshmen came through with five runs on safeties by Carrier, Peene, Balcom, Simmonds and Eager. Chapin finally stopped the slaughter by catching Brown's fly. Earle Bates' team made a rather feeble reply, Robinson making the circuit on an error, Chapin's hit, a stolen base and making the final leg while Chapin was put out at second on a force.

Stoup Clarke went to the mound for '24 in the eighth and while not invulnerable, prevented further runs. In the ninth the Sophomores put together another tally, Michelena stealing his way around to third from first and carrying in the final run on Walters' hit.

TIREX (ALL RUBBER) PORTABLE CORD

A large proportion of portable tool troubles are cord failures. TIREX wears longer than other cords and keeps the tools in operation. It always comes back from one job ready for the next and stays in service, without repairs, more than four times as long as fibrous covered cords.

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY Cambridge, Mass.

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY aims to give thorough instruction in Civil, Mechanical, Mining, Electrical, Chemical and Sanitary Engineering; in Chemistry, Electro-chemistry, Architecture, Physics, Biology, and Public Health, Geology, Naval Architecture and Engineering Administration.

To be admitted to the Institute, the applicant must have attained the age of seventeen years and must pass examinations in algebra, plane and solid geometry, trigonometry, physics, history of the United States (or some other unit of history), English, French or German; after 1921 chemistry. Preparation in one unit of a series of elective subjects is also required. A division of these examinations between different examination periods is allowed. In general, a faithful student who has passed creditably through a good high school, having two years' study of French and German, or three years of either, should be able to pass the Institute examinations. After 1921 chemistry is also an entrance requirement, but like history can be fulfilled by a satisfactory certificate from the preparatory school in place of an examination.

Graduates of colleges, and in general all applicants presenting certificates representing work done at other colleges, are excused from the usual entrance examinations and from any subjects already satisfactorily completed. Records of the College Entrance Examination Board, which holds examinations at many points throughout the country and in Europe, are also accepted for admission to the Institute.

Instruction is given by means of lectures and recitations, in connection with appropriate work in the laboratory, drawing-room or field. To this end extensive laboratories of chemistry, physics, biology, mining, mechanical engineering, electrical engineering, applied mechanics, hydraulics, and the mechanic arts, have been thoroughly equipped. Unusual opportunities for field-work and for the examination of existing structures and industries have been secured.

The regular Courses are of four years' duration, and lead to the degree of Bachelor of Science. In most Courses the work may also be distributed over five years by students who prefer to do so. Special students are admitted to work for which they are qualified; and the degrees of Master of Science, Doctor of Philosophy, and Doctor of Science are given for resident study subsequent to graduation. Opportunity for research is offered in all the departmental laboratories, special opportunities are offered in the Course in Chemical Engineering Practice and in the co-operative course in Electrical Engineering in which the students spend part time in the industries for a combination of technical and industrial training.

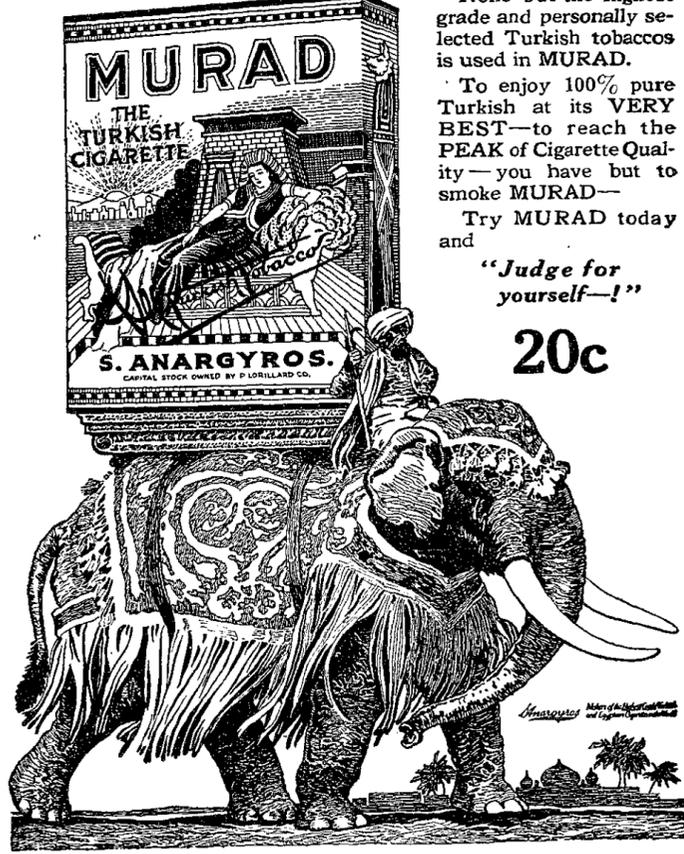

The tuition fee is \$300 a year. A deposit for laboratory fees is also required. In addition, a student tax of \$9 per year is made besides laboratory fees.
