Managers Notified that Certificate Sheets Must Be Filed at Dean’s Office

3. The M. I. T. A. A. requisitions on the executive staff shall be held in the Dean’s Office. Unless these requisitions are filed by the last day of the month, they will be returned to their respective departments for action.

5. The Dean’s Office has been notified of the need for additional copies of the minutes of the meeting held on May 1st.

6. The Advisory Council was pleased to learn that the council will be held on Tuesday, November 7th.

The M. I. T. Outing Club was recognized as an undergraduate activity on the Society Committee at the meeting held on May 1st. The club has been organized to promote interest in club activities, including soccer, swimming, boating, and outdoor sports at Walker Memorial. Meetings of the club will be held on Tuesday nights at 8 p.m.

H. E. S. Varrios, ’25, president, reported that a Christmas program of activities is planned for the coming winter. The club will meet at the social hour on the first Thursday of each month. The program will include a Christmas dance and a New Year’s party.

The Publicity Department has been notified of the need for additional copies of the minutes of the meeting held on May 1st.

Engineering for the Buyer

It is not enough that electrical apparatus should be carefully conceived, skillfully designed, and exactly manufactured.

Engineering, to fulfill all its functions, must go beyond these necessary steps and do a still more enlightened service. It must apply the apparatus in its use, so that not only in design and construction but in service as well, all the conditions that must be reckoned with are fully satisfied.

This function of Westinghouse application engineering covers many fields, and charges itself with many responsibilities. It is engineering that concerns itself with almost every aspect of business, central station, transportation, industrial, mining, electro-chemical, etc. It has the buyer’s interest constantly at heart.

Westinghouse Application Engineering works with such men, with buyers, with consulting engineers, with contractors, and with service and repair men; it finds and investigates new fields; it checks the behavior of apparatus, old and new; it is a bridge over which information passes freely in both directions between Westinghouse and its thousands of clients and friends.

Be glad that you are live and work in times when the spirit of service dominates commercial operations. The greatest change that has occurred in business in the last few decades has been in the minds of men. No longer need the buyer beware for it is now known that the seller’s obligation reaches beyond the completion of the sale; and that it is both wise and right that every reasonable effort be made to give the buyer full value in both product and satisfaction.

The practice of this policy requires engineering of the highest type in research, design, manufacturing and every other phase of Westinghouse operations, but nowhere to greater degree than in the field of application engineering, which is essentially engineering for the buyer.
