ANOTHER MILESTONE

NOW that the exclusive control of the crew house has been given to undergraduate organizations, another milestone on the road of student government has been passed.

That the decision of the Corporation resulting in the change is a wise one and will be well received by the undergraduate body is not to be doubted, for it has been evident that where a purely student interest is concerned it is best cared for by the students themselves.

It is to be hoped that with the increasing delegation of control of student affairs to undergraduates, there will result a greater degree of responsibility on the part of the students and a greater recognition of student ability on the part of the Corporation and Faculty.

TAU BETA PI

THE latest society to make its debut at the Institute is a new chapter of the honorary engineering society, Tau Beta Pi. Its standards provide an incentive for the ambitious to be recognized as among the leaders of their classes.

In admitting to membership only those who satisfactorily fulfill these qualifications, the new society confers a reward of distinction and merit upon those who deserve to be known as leaders among their classmates and who in a larger sense serve to extend the reputation of Technology.

SYSTEM OF GOVERNMENT

WHEN Hearst was seeking the Democratic nomination for governor of New York State some weeks ago, he established two new newspapers in the State in an endeavor to turn the easy-flowing tide of public opinion in his direction.

In the state elections which were held throughout the Union yesterday, it is reasonably certain that in numerous instances the office did not go to the most capable nominees.

Instead of extending the franchise to women a few years ago, it might have been wiser to limit the franchise to men of intelligence sufficient to differentiate between the abilities and honesties of contenders for office.

tion" is merely a name given to the formality in which voters signify their willingness to again accept the favorite of a boss as their leader.

That the present party system is responsible for many of the evils of government is generally recognized. A large majority of citizens vote for party and not for men.
