

EXPECT BOB HENDRIE TO ADD N. E. VICTORY TO LIST OF WINS

Basketball Coach Will Be One of Three Former Collegiate Forwards

The choice of the coach for Technology's basketball team has been narrowed down to three men, D. H. Byerley, James Morley and I. N. Sidman. All of these have had experience on college teams, Byerley playing forward on the Navy varsity for two years, Morley being a forward on the Georgetown quintet several years ago, and later on the B. C. team, and Sidman being an All-Intercollegiate forward for two years while on the Cornell five.

Last evening the basketball management refused to state a preference for one of the trio, merely announcing that its choice would be made public early next week. With a large varsity squad on the job for the last week, and an even larger freshman turn out on the floor, the immediate need for a mentor is apparent. While the members of last year's team, headed by Captain Stan Cook are doing their best, grounding the players in the fundamentals, little progress is being made. All advantage of an early start

will be lost if the coach is not selected at once.

Byerley is a naval officer, now connected with the Florida, which will be in Boston until March. He is coaching the ship basketball team. It is probable that he is used to the sort of game that Coach Allen taught the Engineers last winter, since he was a candidate for one of the teams on which Allen played, and worked under the same coach for the two following seasons.

Byerley was up in Walker gym yesterday afternoon, looking over the squad and getting acquainted with the candidates. He is a young man, probably not much over 25, of somewhat more than medium height and slight build. He talks quietly and his personality seemed to please the Engineers who met him. The Navy man comes from Butler, a short distance above Pittsburgh, in Pennsylvania, the home of basketball. To an outsider he seems the most likely choice for the position of Technology basketball coach.

Need Boxing Managers

The manager of boxing, Bill Rivers, announces that he has need of six freshmen and three Sophomores to compete for the assistant managerships. At the end of this term the number of competitors will be reduced to three freshmen and two Sophomores. These men will be retained until the end of the year, when one Sophomore will be made boxing manager, and two freshmen will be carried as assistants.

Candidates are requested to report in the M. I. T. A. A. office, on the third floor of Walker, any time after 2 o'clock this afternoon, or on Monday after 5 o'clock.

The team from Durham is regarded as the dark horse of the meet though it is not probable that they can carry off first honors. Their defeat of Boston College with a perfect score doesn't mean a great deal in the light of the Eagle's later performances. Both Brown and the Army have also had to bow to the New Hampshire State harriers, however, so the White Mountaineers may be better than they have been rated.

Bowdoin managed to nose out Bates

for second place in the Maine State championships but in spite of those results which seem in the nature of an upset, Bates is held in greater esteem than Bowdoin. Neither of them are seriously considered, however. The battle has resolved itself into a contest between the present champion, Maine, and the deposed one, Technology, with the possibility of New Hampshire showing unexpected power and resolving the fight into a three cornered one.

Hockey Candidates Meet New Canadian Coach at Meeting This Afternoon

A. L. Blacklock, a graduate of Queen's University, Canada, has been selected as Technology's hockey coach, and will speak to all the candidates, both varsity and freshmen, at a meeting in room 10-267 at 5 o'clock this afternoon. Dr. Allan W. Rowe '01, of the Advisory Council on Athletics, will be present at the official opening of the Engineer skaters' season. The winter's program is to be outlined by Captain Herb Hayden and Manager Fletcher.

While the Arena ice will not be available until December 1, it is essential that all candidates be on hand so that they can start immediately on the training schedule. Without this preparatory work the first few weeks on the ice would be worthless.

SOCCER TEAM WILL CLOSE SEASON IN SPRINGFIELD GAME

Tomorrow's Contest Expected to Provide Hot Climax of Schedule

The Varsity soccer team travels to Springfield tomorrow afternoon to play the Springfield College team in the last scheduled game of the season for the Institute men. From all indications the contest will be fast and hard fought as both elevens have been training hard for this year's tilt. The soccer outfits of Springfield and Technology have always put up a good battle and the game has come to be looked upon as one of the most important of the schedule. Interest in the event is high among soccer fans and a number of the alumni of the Institute are planning to meet the team and see that it has the proper support while in Springfield.

The members of the squad have been hard at practice during the last week and are in the best of condition for tomorrow's battle, with the exception of Captain Macorra who has not recovered from the injuries he received a few weeks ago, in the Harvard match, when one of his ribs was cracked. There is a possibility that he will play, depending on his condition Saturday. The line will feel the loss if he is unable to play but another fast combination has been tried in practice which gives promise of good results.

Springfield lost to Harvard and will be eager to even up its score by defeating the Technology players. The Engineers lost last year and can be depended upon to give their best efforts to make it turn out differently this time.

Gymnasts Report Lack of Men for High Bar, Tumbling and Parallels

The Technology gym team is suffering from a dearth of eligible men to take up the burden of keeping Technology's name on the gymnastic map of the Intercollegiate world. The only branches of the team that are up to full strength are the squads on the horse and on the flying rings. Both of these boast of three old performers. Coach Ed Hinks who was with the team the year before last, and who will conduct the practice of the ambitious aerial artists regularly beginning December 1, is expected to prove a strong factor in building up the team.

A score of freshmen are showing up regularly at practice, and, while it is yet early to make predictions, their performance augurs very well for next year's team. All eligible upperclassmen who have, or think they have, or even think they ought to have any chance on the high bar, in tumbling, or on the parallels are to come out for these branches of the sport as soon as possible.

Maine Provided Upset Last Year

A year ago it was believed that the Technology cross country team had a very decided edge in the New England's run. Buker, the distance marvel, gave his college, Bates, second place in the dope. Maine was hardly mentioned in the forecast. If the score had been based on four scorers the Institute would have won in a walk. One man failed to come through and the unknown Pine Tree State outfit won the championship.

The team scores were: Maine 65; Technology 72; Bates 89; New Hampshire 111; Tufts 128; Bowdoin 142; Williams 167; Colby 24; Brown 208; Boston College 241; Holy Cross 254.

Ed Powers Now at Penn

It was recently announced by the University of Pennsylvania hockey authorities that Ed Powers would coach the team this winter. Ed was in charge of the Engineers last season.

The Tech Plays Technique Today

By M. S. MacNaught

It's the morning of the great annual THE TECH-Technique football game! That is, or ought to be, sufficient introduction to the reason why every Cambridge ambulance will be held in readiness all afternoon.

In fact, rumor has it that the powers that be of Technique have warrants already in hand for the arrest of every member of their opponents for murder, and will serve them immediately after the game. In case no member of Technique remains to do his duty, the police "captain" who so faithfully guards the Institute from those who desire to run away with it will substitute and arrest the criminal victors.

Jennings Waxes Mathematical

That Technique has but the grayest of prospects is amply illustrated by the ringing words of D. B. Jennings '24, Editor-in-Chief of Technique 1924, who says for those who will hear: "I very much doubt that our team will win. Of course we will try, and angels can do no more, but when one considers the prestige of such an organization as THE TECH (The capitals are ours—Ed.) there is little hope indeed for the band of martyrs that will try not to uphold Technique's unexcelled record of defeat-defeat-defeat (Continued on Page 4)

THIRTEEN COLLEGES IN N. E. I. C. A. A. CONTEST

(Continued from Page 1)
mis is running his first championship race but the style he has maintained so far this season places him easily the third man on the squad, the position he has held in every race. Leo Poore, veteran of last year, and Roger Parkinson who, like Bemis, is new on the Varsity, have been running fairly evenly. Against Cornell Leo placed ninth, beating Parkey by barely five yards. In the triangular run the veteran again won, this time by a slightly greater margin, but Parkey is always close on his team mate's heels. Tomorrow while fighting for the Cardinal and Gray the two will have a chance to settle their friendly rivalry as well.

Maine Again Greatest Foe

As was the case last year the University of Maine will provide the sternest test of the Institute hill and dale outfit. Four men who participated in last year's victory, Captain McKeenan, Clyde Patten, Ed Kneeland, and Fred Webb, will start tomorrow. The other three members of the squad are credited with being the equals of the veterans so that Maine appears fully as strong this year as in 1921. However, Coach Kanaly has developed a better team this fall than the Cardinal and Gray has had for some time and on that he bases his hopes of victory.

Coach Kanaly Sanguine

"If the men run as they have done all season there is no reason in my mind why we shouldn't carry off the championship Saturday," the Engineer mentor stated. "That it will be close there is no doubt and if a single member of the team has a bad day and fails us the outlook would be gloomy indeed. But going as they have been lately I have every reason to expect that Bob will win first place and Technology run up the lowest total." That apparently means that barring accidents the chances for Captain Hendrie's outfit are very good. Coach Kanaly has already had one misfortune to his team this year in the loss of Keplinger after the Cornell dual run due to blood poisoning. Bill was the fourth scoring Technology runner in that contest and his loss has been seriously felt. So with this recent disaster in mind Coach Kanaly undoubtedly realizes the possibilities for trouble in last minute mishaps and spoke accordingly.
