AIR SERVICE OFFERS FLYING COURSE

Men of ages from 20 to 27 will have an opportunity to learn the necessary mechanical knowledge to take their places in the reserve flying corps, the chief of the Air Service announcing. The training will occupy nine months for balloon and a year for airplane pilots. Cadets will receive $9 monthly for room and clothing. Those who elect the balloon course will be stationed at the nearest point to Boston, while those who elect the airplane course will be stationed in the necessary mechanical demands. Cadets taking the airplane course at the end receive training in dirigible balloon gases, followed by practice in flight. Those who elect the balloon course will be stationed in the country. The nearest to Boston is at Bangor, Maine. The necessary mechanical examination being the only other requirement. Cadets taking the airplane course will receive a thorough foundation in the necessary mechanical demands. Cadets taking the airplane course will receive a thorough foundation in the necessary mechanical demands. Those who have been accepted by an institution of higher education will be considered eligible. Men of ages from 20 to 27 will have an opportunity to learn the necessary mechanical knowledge to take their places in the reserve flying corps, the chief of the Air Service announcing.

Engineering Sells, Too!

A whole lot of the make-believe has been eliminated from selling operations in the past ten years. The old idea that salesmen were born to the sample-case, and that they carried some sort of a special diploma from the University of Poesy, has had to break camp, along with the other exploded theory which insisted that a salesman must be a "good fellow," a man of strange habits, tremendous stories, and unrequited qualities both as a salesman and as an assiduist. We now believe—why, we know—that the best salesman is the man who knows most about his goods, and can talk most interestingly about them. This being the proven case, it isn't so queer that engineering should find a real and effective application in the selling field, especially if the merchandise marketed is an engineering product that is bought and operated by engineers. Every engineer who now engages in the sale and distribution of Westinghouse products feels that he is doing work worthy of his training—for he is carrying Service and Sincerity to Industry, and to mankind! He is out where the fighting is often the fiercest, and he is putting up a battle for the things that he believes in. And a right man can't expect, nor ask, a bigger chance than that!

SIXTY percent, approximately, of the engineering graduates who come to Westinghouse find their way eventually into some phase of selling. And we are proud to have them there—and they are glad to be there!
