

INSTITUTE CHESS TEAM MEETS BOSTON EXPERTS

The Institute Chess Team, in the second match of the Metropolitan Chess League, is to meet the team representing the Boston Chess Club. The match will be at the Boston Chess Club Friday evening at 7:30 o'clock.

The reputation of the Boston team is, that of a team hard to beat, say the chessmen, and they are expecting a hard match. The probable list of Institute players is as follows: W. W. Adams '23, G. W. Harvey '24, I. H. Stark '23, T. M. Edison '23, Arne Lier '24, Paul Kusnitz '24, E. B. Lederman '23, S. E. Chiese '26.

Freshmen Lack Coach

Though D. H. Byerley has been secured as basketball coach he will spend all his time with the varsity outfit, and consequently the freshmen are still bossing themselves, with a little assistance from Stan Cook, varsity captain.

TECH STUDENTS who contemplate the purchase or rental of Dress Clothing will do well to patronize the Boston Dress Suit Co., 309 Washington St., Boston. They can make their selection from a stock of Brand New Silk Lined Clothing of latest young men's design and fine quality. They sell slightly used clothing at a price that is very attractive, and the regular 25 per cent discount for students makes rental reasonable. Any accessory may be rented or they will outfit from head to foot.—Adv.

Metcalf to Have Post of Baseball Manager; A. A. Awards Insignia

The election of Walt Metcalf '23, as supervising manager of baseball for the coming season was the chief item of business transacted at the meeting of the M. I. T. A. yesterday afternoon. Baseball is to be participated in by all the classes this spring, and the position of manager, whose duties include the supervision of all the class managers, as well as the arranging of schedules, is an important post. R. H. Smith '23, manager of crew last year, was unanimously awarded a straight T in recognition of special service, his work last year being considered the prime factor in the admission of Institute crews to the American Rowing Association. The election of F. G. Clement '23, as Captain of the Golf team for 1922-1923 was also approved.

T. C. A. Lists Available for Managers

The lists compiled by the T. C. A. from the information cards submitted by the freshman class were also received by the President, J. C. Nowell, Jr., '23, and were put at the disposal of managers. A. D. Smith '23, representing the Point System Committee, announced the new system of checking up on the candidates for the various teams, and asked the co-operation of the managers in establishing it. The charm to be awarded for participation in minor sports was also exhibited, and orders are to be taken at the office of the M. I. T. A. A. next week.

Award Class Numerals

Manager Hungerford's report on Intra-Mural Crew was accepted and numerals 1923 awarded to R. H. Kean, J. R. Lewis, J. L. Brill, P. C. Smith, D. C. Sayre, A. M. Valentine, J. H. Scholtz, Jr., H. D. McKinnon, and R. J. Evans. Recommendations for class numerals 1925 were also approved for the following men: G. L. Bateman, J. M. Campbell, D. H. Drukker, E. M. Holmes, J. A. Hoxie, G. F. Jourdan, G. F. Mahoney, L. D. P. Milano, A. W. Makepeace, W. T. McHenry, J. E. Russell, C. L. Norton, M. W. Brewster, A. V. Alm.

SPIKES

(Continued from Page 3) recognized as a contender for individual honors in the championships. In fact so highly is this star esteemed at Carnegie that there is some truth in the rumor that the main reason for the Pittsburgh team's entrance into the run is to give their idol a chance to show his skill.

Reports have come to us from New Haven that Mal Douglas is getting back into old time form again and that the Blue is counting heavily on its old favorite. After his winning the freshman title in 1920 and his last year's performance Douglas was held to be a sure fire wonder this fall. But something went wrong. We saw him at Belmont in the triangular run of the Big Three and his running there was certainly not impressive. His team mate Treadwell was the winner and showed the only real class that Yale had. Mal was hard put to it to get seventh, trailing his old rival Billy Burke of the Crimson by fifty yards. Still it may have merely been a bad day for the Eli star. And if such is the case Mal will prove himself a dangerous rival at Van Cortlandt. In top form Douglas needs take a back seat to mighty few college distance men.

MANY CANDIDATES NOW OUT FOR WRESTLING

(Continued from Page 3) the 115 pound crown in the New England Intercollegiate. Bruner has also won laurels in track.

Hazeltine Moves Up to 135

Ray Harte and Bill Vicinus are the most prominent among the 125 pound contestants. Harte made his debut last winter with the Beaver cubs while Vicinus has been confining his attention to the gym team. Wrestling is a bit new to Bill, but so was it to Harry Bruner. Francis Hazeltine wrestled in the position last year but an increase in weight has made it impossible for him to make 125 pounds. He will probably look for contestants in the 135 pound class. This will be his third season with the varsity.

V. J. Weatherly will no doubt give his team-mate, Hazeltine, a hard fight in the 135 pound elimination bouts. Weatherly won honors in this class last year with the varsity and the year before, wore the frosh colors in the same berth. Cohon, who is a veteran of the Boston Young Men's Christian Union wrestling team and who represented the Engineer cubs in the 135 pound class last year, is out for varsity laurels in the same weight. Cohon, who is also considering the 135 pound berth with the boxing team, has the makings of a good 135 pounder. G. H. Smith is a dark-horse in

the list of 135 pound entries. He was captain of the Indiana matmen.

In the 145 pound entries there will be quite a bit of competition. Herm Pike, who was wrestling manager a year ago, but nevertheless has kept in trim for the past two years, is out for the team again this winter. He will find a strong contestant to his claims to the 145 pound place in the person of Art Sheppard, who captained the Engineer cubs last winter, but wrestled in the 158 pound class. Bowles of the previous season's frosh team is out for the same class.

The 158 pound weight has its most promising representative in Rock Hereford, Institute wrestling captain. Hereford started on his way to Institute wrestling fame when he proxied for Ferris Briggs, and now is one of the best men on the team. Walt Kennet, who represented Technology last year in the 175 pound weight, is back again and will no doubt defend the same berth. S. D. Heath of last year's varsity is out for the unlimited class position.

MISS F. H. LUSCOMB IS CITY COUNCIL NOMINEE

Miss Florence Luscomb, Class of 1909, and at present an architect in Boston, has received a sufficient number of names to guarantee her position on the ballot in the coming elections for City Council. She is the clerk and assistant executive secretary of the Boston League of Women Voters, and a member of the Boston Women's Club.

Miss Luscomb did not enter the competition until last Friday and then only because of a strong demand by many of her friends. She then had but three days to obtain the necessary 2000 signatures of registered voters before 5 o'clock yesterday. She not only obtained the required number of names, but surpassed that amount by 2429, making a total of 4429, an average of about one a minute.

CALUMET CLUB MADE INSTITUTE ACTIVITY

(Continued from Page 1)

fy a very necessary phase of athletic competition. The point that I desire to emphasize is that Technology athletics are meant to foster amateur and gentlemanly competitions rather than gladiatorial combats for financial benefit, and this club in promoting that friendly spirit between the competing institutions, while not in any way lessening the spirit of competition, will most certainly advance the ideas of clean sportsmanship, and be a very worth while advantage to the men participating in this extension of hospitality.

The club derived its name from the old Indian pipe called the "Calumet" which signified hospitality to strangers. Analogy to its present use can be easily seen in the fact that the Calumet Club aims to care for the wants of the visiting teams at Technology.

The Secret of Business Leadership

IF you have taken advantage of your college training—if you have made the most of the opportunity presented through your various associations in school, you have become inspired with certain fixed ideals and definite ambitions. Your aim is high. You are anxious for progress and growth. You wish to become a credit to yourself and your family.

You want to become a leader and establish a reputation for yourself in the field you have selected for your life's work. Have you chosen business? If so, and if you seek leadership in the commercial world—here are facts worthy of your deepest consideration.

The principles of leadership in business are not many in number. They are not hard to grasp. Yet less than two men in one hundred ever learn them.

The two chief reasons for this failure are: (1)—lack of an all-round business experience. (2)—the difficulty of drawing sound conclusions from the relatively few experiences that any one person can have.

A Study of Leaders

Through your studies thus far you have created for yourself a substantial background—a foundation upon which you can build high. Why not use this foundation in the largest possible way? If you are truly ambitious for steady and permanent progress, it will be well for you—in addition to your undergraduate work to consider the advisability of special training which will cut off years of apprenticeship in the business world. This training is available at the Babson Institute—an educational institution organized under the laws of Massachusetts not for profit.

Every man who hopes to be a leader in the business world needs special training—a training that can be had only from actual experience. A study of the successful business men of today shows they are those who have—(1)—a fundamental knowledge of business principles; (2)—a faculty for the practical application of these principles to daily business life.

These tried and proven principles, this gift for application may now be yours.

The Business of Learning Business

The specialists of the Babson Institute have spent years in business research, laboratory work, and the study of the lives of successful men. They have arrived at the fundamentals which every one must have to achieve leadership in business. These vitally important facts have been put together in clear, understandable form and con-

The Laboratory Method

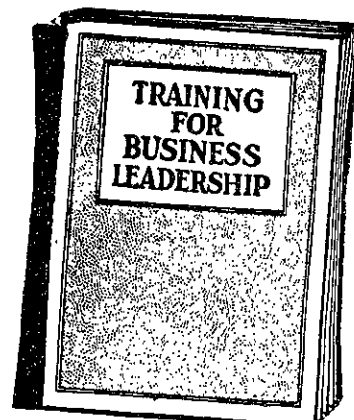

Since it is the purpose of the Babson Institute Course to train men for business, all work and all study is conducted in the same manner as work is conducted in any regularly established business house. For instance, there are regular office hours not merely school hours. Lessons and reports are dictated by the student as in an office—not written. Thus the student acquires a mastery of business English and the ability to transform quickly his thoughts into definite form.

Teaching in Conference

Classes are conducted on the conference plan. The teachers, or directors as they are more properly called, are experienced business men, successful in their own line. Factory inspection trips are not long distance walking matches, but personally conducted tours by experts in that particular industry. The problems discussed are present-day ones and are drawn from actual experience. They are the same problems on which over 17,000 of America's keenest executives are seeking aid and solution from the largest organization of business advisers in the world. The student at Babson Institute works on actual cases—not hypothetical problems—and consequently he develops the business man's point of view.

Business Clinics

The student at the Babson Institute learns to do the things he will be expected to do in business by constant contact with actual business procedure. He participates in the clinic instead of sitting in a class. The training covers the four major divisions of business, Manufacturing and Production, Financing, Distribution and Marketing, and Management. If you are anxious for achievement, if, by inheritance or initiative, you seem destined to become one of our leaders of business, send for particulars about this training and its unusual teaching methods.

Send for this Booklet!

"Training for Business Leadership." It describes the courses in detail, and gives complete information of the facilities of Babson Institute. You will learn of the practical methods peculiar to this institution by which men are fitted without loss of time for executive positions. No obligation.
