PROFESSOR GILL GIVES LECTURE ON LIGHTS AND COLORS
Idea Regarding Gasoline Shows Talk

At the meeting of Course 3.9 held Friday afternoon in the Gilch Office Laboratory of the Department of Chemistry, Professor A. H. Gilch gave a lecture on the subject of light and color. He discussed the properties of gas and the manner in which it can be used for illumination. He also discussed the use of gas in the field of photography and its importance in the development of motion pictures.

FREE LECTURES GIVEN AT LOWELL INSTITUTE
Six Addresses by Dr. Rice on Journeys in Tropical America

A series of free public lectures is being given by A. H. Rice, M. D., on the theme of "Journeys in Tropical America." The lectures will cover various aspects of tropical medicine and its impact on the lives of those who live in these regions.
