FEMININE NUMBER TWO?

By Prof. E. E. Rogers

I have to wonder why these women of the present generation have such strange ideas about beauty. I mean, really, is it a necessity to cover one's head in this day and age? It seems to me that if one wants to be beautiful, it is better to let nature take its course. Some women seem to think that they have to look like a man in order to be considered pretty. But that is simply not true. Beauty is something that comes from within. It is not something that can be forced upon a person. So, why not let the woman be herself? Let her express her own individuality and let her beauty shine through. After all, it is the only way she can be truly happy.
