PRESIDENT ROGERS
Founder of Technology. Served as President from 1853 until 1876, when illness necessitated his resignation. He resumed his duties in 1878, and although in poor health, gallantly served the Institute through a rocky period for two more years. He died in 1882.

PRESIDENT STRATTON
Recently chosen President of Technology and will be officially inaugurated in June. His record of achievement in organizing the Bureau of Standards from a small institution to a now internationally famous bureau speaks well for the Institute’s future, and it is believed that Technology’s activities will be given a new impetus under his administration.

PRESIDENT CRAFTS
Succeeded President Walker after his death in 1899. Was in office for only three years, submitting his resignation in 1902. He was followed by President Pritchett.

PRESIDENT Pritchett
Inaugurated in 1900. Under his administration the Technology Union was established and $100,000 obtained for the erection of Walker Memorial. He resigned in 1907.

PRESIDENT MACLAURIN
Came to Technology from the Department of Physics at Columbia University to be inaugurated President in 1914. Under his capable leadership the plan of the present Technology was conceived and realized. He was largely instrumental in the organization of prominent men like Mr. Eastman to the Institute. Under his leadership the endowment fund for the future became a fact. He died in 1920 to take his place with President Rogers and President Walker as one of Technology’s great leaders. Since his death Technology has been without an active President until the recent election of President Stratton.

PRESIDENT WALKER
Inaugurated in 1881, having previously served as President of Political Economy in the Sheffield Scientific school at Yale. Under his leadership the Institute was greatly expanded, both financially and intellectually. President Walker died in 1897.

PRESIDENT RUNKLE
Was Professor of Mathematics at the Institute. He served as President during the absence of President Rogers due to illness from 1870 until 1878. During this period the Institute was passing through a critical period in regard to finances but disaster was averted through the efforts of the faculty and generous friends.

PRESIDENT NICHOLS
Former President of Dartmouth. Inaugurated Technology in 1881. Forced to resign because of illness and never resumed his active duties as President.
