

TECHNOLOGY LOSES TO BOSTON COLLEGE ON ICE LAST NIGHT

Maroon and Gold Scores Four Goals While Shutting out Engineers

HUGH NICKLE, IN NET, PLAYS WONDERFUL GAME

Clever Work of Institute Goal Tend Features—Culhane Gets Three Points

After holding the crack Boston College skaters scoreless during a fast opening period at the Arena last night, largely due to the accurate agility of Goal-tend Hugh Nickle, Technology's hockey team was penetrated for two goals in the second session and another pair in the nightcap, losing by a 4-0 count.

Culhane, a B. C. wing man, scored three of the goals, one shortly after the starting whistle of the second period, another along about the middle of that period and a third early in the last round. Foley, in center ice for the Eagle, got the final counter seven minutes before the end of play.

Nickle Peppered

There is no doubt now about who played goal for Technology. Hugh Nickle was in there and it is largely to him that the Engineers owe the record of holding B. C.'s good team to four goals. Hughie was peppered right and left from beginning to end of the battle, and his excellent work in the frequent scrimmages on the Institute door step, featured the contest.

The Boston College defense pair, Morrissey and Garrity, was almost impervious. Very rarely did the Institute attackers break through and when they did the slight but capable Fitzgerald was there to meet them. Captain Hayden was the main spring of the Engineer drives down the ice which, though fruitless were often cleverly conducted and give promise

NEW DORMS NEEDED, SAYS DR. STRATTON

Will Hold Conference Today to Discuss Problem of Housing

ACCOMMODATIONS LIMITED

Dr. Stratton, Technology's new President, has voiced his approval of plans for further expansion of the Institute dormitories in order to take care of the increased number of applicants for rooms in them. Today Dr. Stratton will confer with the Committee on Dormitories, and will go over new plans that are proposed to supply the present deficiency in this matter.

In an interview yesterday afternoon, in telling of the housing problem of the students, Dr. Stratton said, "I am interested in providing more dormitory quarters at Technology and am going to co-operate with the committee of the Corporation in making a thorough study of the plans."

President Meets Department Head

As yet, no definite idea can be had of the requirements for the new dormitories before a comprehensive study of the situation is made. This, together with his previous experience as Professor at the University of Chicago, will enable Dr. Stratton to arrange a more satisfactory dormitory system than is at present in use. Only about 175 men can be accommodated in the present buildings, which were built seven years ago, and which are comparatively much smaller than those in use by the majority of colleges and universities.

Dr. Stratton has taken immediate hold of the Institute problems, and during the past week has been acquainting himself with the various courses and the professors in charge of the departments.

Since the first of the year, the home built for Technology's presidents has once more been opened, and is now being occupied by Dr. Stratton and his secretary, Mr. M. A. Paris.

F. C. A. WILL SUPERVISE BOYS' BASKETBALL GAMES

Demand for Men in This Field Large This Term

The Boston Y. M. C. A. is arranging three basketball leagues, among the younger employees of newspapers, banks, and retail stores in Boston, which will play games in the Walker gym and in the gym of English High School on Monday and Wednesday evenings. The supervision of the games in Walker has been given to the Boys' Work Department of the T. C. A. and letters have been sent by W. H. Corrales '24, director of the department, to men who were listed on their cards as being interested in this sort of work, and these men and any others interested are asked to see him or call at the T. C. A. office for more information.

There are numerous other demands from neighborhood houses for men to supervise basketball and gym classes, and to coach dramatic work, all of them taking time one or two evenings a week from about 7:30 to 9:30 o'clock, or on Saturday afternoon. The Elizabeth Peabody House of Charles Street in Boston has sent in a call for nine men for this work, the Dorchester Neighborhood House for two, and the North Bennet Industrial School of Boston for one. These are but a few from the list which the department has in its files.

TECHNIQUE INTENDS THOROUGH CAMPAIGN

Canvassers Stationed in All Institute Corridors Next Week

BOARD MARSHALS AT RUSH

Thoroughness is the keynote of the Technique 1924 sign-up campaign, which is scheduled to begin next Monday, and continue all week. The Technique Board plans to have canvassers in every corridor to sign men up for a copy of this year's book.

As stated before, it will be impossible to obtain a copy of Technique next April without a sign-up slip, which costs a dollar. Those who wish to obtain extra copies of the book must sign up for them also next week to avoid disappointment in the spring.

Signups Required for Rush

The Technique board advises students to wear the buttons given out with every sign-up, to avoid being spoken to more than once by the canvassers. Most of the canvassers will be men who are competitors for the Technique board; consequently they will be very active in selling the sign-ups.

The Board states that positively no one without a sign-up will be allowed to take part in the rush. The ground on which the rush takes place will be roped off, so that no one without a sign-up will be able to participate. The entire Technique Board will act as marshals for the event, to see that the rules are enforced.

The dollar paid for a sign-up applies on the total cost, \$2.50, of Technique, and holders of sign-ups can get their books next April upon presentation of the sign-up and \$2.50. The sign-ups are not good after May 1, 1923.

MECHANICALS WILL RUN SMOKER UNDER NEW PLAN

Program Begins At 5 O'Clock in Room 5-330

On January 18, the Mechanical Engineering Society will hold a smoker in room 5-330 at 5 o'clock. A new plan has been evolved and is being tried out in that the smoker will start at this earlier hour instead of the usual time of 7:30 o'clock. It is hoped by this plan that more men will find it convenient to attend. Especially those men living out of town will be benefited by the arrangement as they will not have to stay until a late hour.

Supper Served in Building 5

A moving picture on "The Making of Cast Iron Pipe" will be shown first. From 6:15 to 7:00 supper, the price of which is to be announced later, will be served in the basement of building 5. After supper the party will go back to 5-330 where they will witness an entertainment until 7:30, when Mr. Ely of the Monks-Johnson Company will speak. Movies and music will close the evening at 8:30.

OLD TECHNIQUE ELECTORAL SYSTEM ABOLISHED AFTER HEATED DEBATE

Decisive Action Taken Yesterday by Institute Committee in Voting to Establish Year Book on Competitive Basis

1924 BOARD ISSUES CALL FOR CANDIDATES TODAY

What has been branded as one of the most vicious aspects of undergraduate life, the Technique Electoral Committee, has been done away with and Technique has been placed on a squarely competitive basis. This action came as the result of one of the most spirited meetings of the Institute Committee held in recent years. Led by the convincing arguments of C. C. Taylor '23, the Institute Committee rejected the report of the Committee on the Electoral Committee that it was inadvisable to make such a change at the present time, and taking the matter into its own hands, decided on immediate reorganization. As a result, competitions leading directly to positions on the 1925 Technique Board will start today. Positions will be chosen on a purely competitive basis, and the Electoral Committee now belonging to history, will have nothing to say in the matter.

T. E. N. NEEDS NEW MEN IN PUBLICITY DEPARTMENT

All but one man in the Tech Engineering News publicity department are graduating this June. In consequence, the manager states, there is good opportunity for any new men coming out for this department. The competition is now open and there is room for about six men. Previous experience is not at all necessary, though a factor in favor of the possessor.

WILL DISCUSS HYDRO- ELECTRIC PLANT TODAY

This afternoon at 4 o'clock in room 5-220, the Civil Engineering Society will hold a combined meeting with Corporation XV, at which will be given moving pictures and talks on the recent Caribou Hydro-Electric Development on the Feather River in California. The speakers, A. A. Northrup and C. W. Kellogg '02, both of Stone & Webster, will discuss respectively the engineering and financing of the project.

At the close of the meeting the Secretary of the Civil Engineering Society will have official membership cards ready for distribution to members of the M. I. T. Student Chapter of the American Society of Civil Engineers.

PLAN FRESHMAN SMOKER AT OFFICERS' MEETING

Hope to Secure Dr. Stratton as Principal Speaker of the Evening

Plans for a freshman smoker to be held soon were discussed at a meeting of the officers and section leaders of the Class of 1926 yesterday afternoon. Several committees were appointed to look after the various phases of the event, and it is hoped that in addition to the other attractions of the program, that Dr. Stratton will be secured as the speaker.

The chief purpose of the smoker is to get the freshmen better acquainted with each other, and in order to attract as large a crowd as possible, the progress committee is planning some interesting features. Besides Dr. Stratton, who will be secured if at all possible, there will be a short musical program, either by the Musical Clubs or the Tech Show, or failing to get these, an outside act will be hired.

Uniforms for Basketball Team

The refreshment committee promises to do its share toward getting out a crowd by serving free food, probably at the end of the smoker. The customary cigarettes will of course be furnished. Another committee has been appointed to attend to the publicity of the smoker.

During the meeting yesterday the fact that the freshman basketball team did not have uniforms was brought up, and it was the unanimous verdict of those present that uniforms should be bought as soon as possible, providing that doing so would not be too much of a financial strain upon the class treasury. A committee was appointed to look into the cost of securing uniforms and to report at the next meeting.

TECH SHOW ORCHESTRA GIVES FIRST CONCERT

Initial Appearance at the Franklin Square House Is Well Received

The Tech Show Orchestra opened its season last Tuesday evening at the Franklin Square House, giving a concert before an audience of about 400 people, which was very well received. The concert was followed by dancing, the music for which was furnished by the Tech Show Orchestra. The management wishes to express its appreciation of the work of the Orchestra director, C. A. Young, who has brought the performance of the Orchestra up to its present excellence at such an early period in the season. This is the first time in the history of Tech Show that the Orchestra has given a preliminary public performance.

The concert program was as follows:

1. Wedding March from "Rat-charmer of Hamelin".....Nessler
2. Overture, "Orpheus in the Underworld".....Offenbach
3. Three dances from "Neil Gwyn".....German
4. Selection from "The Fortune Teller".....Herbert
5. Specialty—String Orchestra
"En Sourdinc".....Tellam
"En Badinant".....D'Ambrosio
6. "Scenes Pittoresques".....Massenet
7. The Stein Song.....Ballard

ALUMNI HOLD BANQUET IN PRESIDENT'S HONOR

Arrangements Made for Over 650 at Big Dinner in Walker

Tomorrow night at 7 o'clock the Alumni Association will honor our new president, Dr. S. W. Stratton, with a dinner in the main hall of Walker Memorial. During the dinner the Technology Musical Clubs Jazz Band, which has recently returned from its winter trip, will furnish music with occasional acts by the Glee Club.

The speakers for the evening are Dr. Stratton, Dr. A. L. Lowell, president of Harvard and member of the Corporation, and Dr. C. A. Eaton, a prominent publicist. H. J. Carlson '92, president of the Alumni Association, will be the toastmaster.

Many ladies will be present, prominent among whom are Mrs. R. C. MacLaurin, widow of the late President MacLaurin of Technology; Mrs. H. J. Carlson, wife of the president of the Alumni Association; and Mrs. W. M. Humphreys, wife of Mr. W. M. Humphreys '97, secretary of the Alumni Association.

At a luncheon meeting last Wednesday, the Committee on Assemblies, Mr. O. B. Denison '11, chairman, made the final arrangements for the affair, making accommodations for over 650 people. They decided to have the Jazz Band play between 6:30 and 7 o'clock in the corridor for the benefit of those who are waiting in the lounges. The Glee Clubs are also going to serve as a background for the Technology songs which will follow the dinner.

The details of the change will be in the hands of the present Technique Board and a Committee of five men whose duties are to take charge of reorganization and be general advisors of Technique for the rest of the year. The committee is headed by G. F. Nesbitt '23, the other members being C. C. Taylor '23, T. M. Taylor '23, F. G. Harmon '23, and D. B. Jennings '24. They will have their first meeting Saturday.

Denounces Previous System

Assailing the Electoral Committee as a "rotten political system," C. C. Taylor, together with other members of the committee kept up a continuous attack upon the present methods of running Technique, pointing out the necessity of having a presentable yearbook for comparison with those of other colleges, stressing the necessity of having continuity of management if this is to be attained, and emphasizing the fact that there is no room for an activity which does not keep pace with its fellows and progress as time goes on.

Unbounded enthusiasm was shown by members of the Institute Committee over their decision. R. J. Shaw '23, chairman of the committee, during the meeting, said that it was "the most important matter that has come before the Institute Committee this year." After the meeting, he said that he believed the right step had been taken and was heartily in favor of the change.

Competition to Open Immediately

One pessimist declared, "If Technique is not put on a competitive basis there will be no year book in three years." Others held the same belief in view of the fact that the present competitions were so low win men.

Jennings, the present Technique Editor-in-Chief, said that he would at once put the vote of the Institute Committee into action. He is opening a new competition today for both Sophomores and freshmen, and asks that all candidates report at the Technique office as soon as possible. Sophomore candidates will be elected to the Technique 1925 Board early in the spring, freshmen candidates out for the Sophomore competition next fall.

The actual vote passed by the Institute Committee is as follows: "That in the future Technique be managed and operated on a competitive basis. Furthermore, that a committee be appointed to advise and supervise the amendment of the present constitution of Technique in accordance with the first part of this motion."

Following the Technique discussion, the report of the committee appointed to give assistance to the Corporation was read. It told in detail how the plans were carried out to secure a large attendance at the convocation

CALENDAR

- Friday, January 12
5:00—New York City Club meeting, north hall, Walker.
8:00—Chess team meeting, east lounge, Walker.
8:00—Musical Clubs Concert, Simmons College.
- Saturday, January 13
Last day for Seniors to have pictures taken for Technique.
5:00—Alumni Association, all Walker.
- Tuesday, January 16
8:00—Math Club, Faculty and Alumni room, Walker.
- Sunday, January 14
5:00—Episcopal Club meeting, Faculty and Alumni room.
- Monday, January 15
9:00—Technique Sign-up Campaign begins in Main Lobby and Walker.
- Friday, January 19
8:00—Catholic Club Dance, main hall, Walker Memorial.
