M.E.T.A.A. Has Increase of $1600 to Spread over 26 Sport Demands

A. M. T. A. A. has increased its money to $1600 to spread over 26 sport demands. The budget for the year is $230,000, which is $1600 more than last year. The increase is to be spread over the 26 sport demands, and the chairman of the committee will make arrangements for the evening to be as interesting as possible. The increase is due to the requests of the students. The committee requests the support of the students in their work.

Corporation XV to Make Spring Tour

The Corporation XV will make a spring tour in May. They will leave Boston on May 25th, and will return on May 29th.

Paragaphs for Hibernating Crews

Manager Hangerford has been into the archives of the past years and has chosen some interesting paragraphs for the hibernating crew. These paragraphs are being read by the crew each morning to keep them interested during the winter months.

The Tech

February 1, 1925

STUDENT GOVERNMENT AT INSTITUTE UNIVE.

The recent drastic changes in the organization of the Tech are a great step forward. The new Institute Committee over student affairs is reorganized and the Institute Committee is unique among American colleges: the fact that the student body holds all or nearly all of its own affairs without interference of the faculty is a great step forward. This is a well-deserved tribute. Through its policies, the Institute Committee and its standing committees have been the student body guides and regulators. The activities of the government are done by these committees. The student body holds the General Committee, which is at present composed of 35 members. In the past, each class, the class president and two others elected by the class at large, and the class secretary and two others elected from each undergraduate organization to which they belonged. There is at present only one table on the standing committee, and it is proposed to enlarge this by giving effective Institute Committee, which is at present composed of 36 members. The student body is thus able to conduct its fruitful in-...
