**TECH CIRCUS SIDE SHOW CHALLENGES PROHIBITION ACT**

**THE TECH Staging Bar—Big Exhibit Promised by Electricals**

An unfamiliar object will be on view in the Tech Staging Bar before March 1. A genuine Prohibition bent is in operation, under the auspices of THE TECH. At last year there will be theoretically countless legs of refreshment, and a fine bunch. In addition several novelty acts are promised.

The Professional Societies are also planning a side show. This is a project of the REC Electrical Engineering Association. In view of the opening of the show they are prepared to go on the road with their program in a few weeks. The show will be held in the Memorial Hall, March 28. Their show will be featured by several well-known radio personalities and many shots for those who have been seen at the circuses.

"The Leslie Clark," a pop-up speaker, will also be featured, and only original material, will go on as well. The entertainment is planned to be a sort of three-in-one of last year's "Clark," the objects of the exhibitions, and the side show of Eastern amateurs. All the sides show, exhibits and performances are planned.

**SPEAKERS CLUB PLANS EXPANSION NEXT TERM**

At a meeting of the Speakers Club at the house last Monday, plans for the future development of the club were discussed. It was decided that for the remainder of this term the club would continue the program of series of speakers, all speaking would be discontinued, on account of the final examination period.

Mr. W. T. Coulth, the Boston attorney who has been engaged to frame the by-laws for the club, was asked to continue his work. It was decided that the discussion of the factors which make an able speaker should continue, and that every talk must have some common point of motive, must appeal to some common taste of the audience, must answer a definite need. These were the rules of the club, and the rest of the members were asked to follow these rules and to work for the expansion of the organization, and increasing its value to the students.

**VI-A MEn HIKE AND TOBOGAN SATURDAY**

Plans for Furthering Course VI-A Explored Last Monday

This Saturday the Course VI-A men studying at the Institute are going to take a little out of the Freeway and across to Franklin Park where they will spend the day. It will be the afternoon on the lake. All the men in the course will be there, and the main party will be at 12 o'clock. If the condition of the snow permits, a canine party will be available at the house, and arrangements have been made for food.

This trip and toboggan party is the first of the course's annual outings. The last Monday for the purpose of discussion of the problems of their course, they will be called the "Ask the Student" and "The Engineers" will be invited to join in the discussion of the problems of their course, and the students and the Engineers will be invited to join in the discussion of the problems of their course, and the students will be invited to join in the discussion of the problems of their course.
