The Stag

He has the pride of the peacock, the courage of the lion and the combined nerve of the whole menagerie. And why? Because he is sure of himself—and sure of his appearance.

As the last and cleverest touch to his toilet, he smooths his mane with "Vaseline" Hair Tonic. His head stays dapper and sleek throughout the giddiest whirl.

"Vaseline" Hair Tonic improves the hair. At all drug stores and student barber shops.

Every "Vaseline" product is recommended everywhere because of its absolute purity and effectiveness.

TRACK MEN GATHER IN ANNUAL MEETING
(Continued from page 1)

up to is the New England Intercollegiate which will take place on Tech Field on May 18 and 19. The Engineers have won the banner for five years running and retained possession of it by tying B. C. last year. Only one more leg is necessary to gain permanent possession of the cup and banner and it is the main purpose of the work this term to get a team into shape that can bring home the bacon. The Harvard and Dartmouth meets are important but are mere stepping stones toward the final goal. Boston College is the nearest rival the Engineers have and it is the aim of the team to produce a combination that can beat the Maroon and Gold.

Frosh Are Best Yet.

In speaking of the teams, Coach Kanaly said that the Varsity would go far in producing a winning team for the New England and that the frosh outfit was the best one that had represented the Institute for a good many years. The frosh are going to help fill a lot of positions on next year's varsity and a good frosh team goes a long way toward helping to produce a strong varsity the next year. All the frosh candidates were urged by the coach to be out for the good of the team and not merely to get out of physical training. The number of men makes it imperative that every man do his best and work for the interests of the team.

Regularity is Keynote.

Coach Kanaly stressed regularity as the most important thing in training. To attain a high degree of perfection in track work," the coach stated, "it is necessary to be regular in everything. Regular practice, regular hours for sleeping and above all regularity in meals and abstinence from eating and drinking between meals count a great deal in building up a body which can give its best efforts in track work. The training table will help solve many of our problems this year. The table will give the men an opportunity to get together and obtain good meals of the right kind of food and eat it as it should be eaten instead of dashing through a meal as the tendency is when eating at most restaurants."

Equipment Improved.

The next thing that the coach took up was the type of practice desired from the regular workers. The men are to sign up for their hours of prac-

men arrange their hours so as to group the men in their own events and give them a chance to work together and become accustomed to being on the track with somebody at their elbow. Four days a week are the usual requirement for practices from most of the men. Monday, Wednesday and Saturday are the best days for carrying out this requirement. The difficulty with much of the work here was the bunching of training, chiefly in the field events. Another point that was emphasized by the Engineer mentor was the desirability of training in the best equipment available, instead of doing practice work in old or worn equipment. This leads to best results. It is also very important that the men do everything required of them, recording their performances when on trials in the field events and being timed on any running trials.

Saturday Work Restricted.

The work desired from the men was covered fully by the remarks of the coach and he brought out as the most important part of his talk the fact that no one would be allowed to run before 2:30 on Saturday afternoon. "The Saturday afternoon work is the most important of the week and we can't get as much out of it if several of the men come out at one o'clock, without eating lunch, and do their work for the sake of getting home a few hours earlier. The chief reason for this is that we want the men to have the noon meal to work on and if anyone runs early, he has to go without this. And then, the first event in intercollegiate competition is usually called at this time and we want the men to get used to competing after their noon meal," said the coach in bringing out his point.

Another source of much talk and discontent, Coach Kanaly went on, was the rubbing list. Doc Johnston is a mighty hard and a mighty willing worker, but to do the rubbing for the whole squad is an impossibility for one man and in the future only those men who are on the team and will receive the most good from the rubs will be on the list. The men who make a good showing in the first competitions will probably make up the list.

Versatile Oarsmen Turn Icecutters to Clear Basin Course

Institute Crews to Practice on Charles in Spite of Remaining Ice

One could think of a lot of nicer ways to commit suicide than by venturing on the surface of the Charles when in its present condition. But to the innocent bystander, that is what a bunch of the crew men were trying to do yesterday. In reality they were endeavoring to remove the few remaining cakes that prevented the first practice of the term from being held on the river, and they succeeded so well that some of the boats may be able to take the water today.

Armed with boat hooks and an ax or two a bunch under the direction of Coach Arthur Stevens managed to get loose some pretty big floes and sent them out toward the middle of the basin where the way is clear. The river above the Cottage Farm Bridge is practically open water with plenty of room for some good spins and all that is lacking now is the means to get there with the crews. However, with the present run of warmer weather it is a matter of days till the first troutons in the shells can be held.

With the first races at Annapolis with the middy oarsmen, coming in about a month, the time for the final selection of men is getting near, and is only held off by the condition of the basin. The varsity is at present pretty well outlined, but the 150 pound eight, to row the Navy plebes, is not as well defined and will need considerable work on the basin before a more definite selection can be made. There are at present about 125 men appearing more or less regularly for practice but this figure is far below the number that can be advantageously handled. Now that outdoor practice is expected most any day, the management is looking forward to an influx of new material for all the crews, thus insuring the selection of winning outfits.

INDOOR COURT IN NEW GYM READY FOR USE

Early Practice to Meet Hard Tennis Schedule Now a Possibility

The indoor tennis court which has been under construction in the New Gym is now available for play and will be used constantly by members of the tennis squad and others interested in tennis. The court will be reserved for the tennis squad from 3 to 6 o'clock every afternoon but can be used by students any other time during the day, if first they make reservations for it in the Athletic Association office in Walker, between 2 and 5 o'clock each day. No charge will be made for the use of the court and it is expected that a large number of tennis enthusiasts will take advantage of this opportunity to get in some early practice.

Next Monday there will be a meeting of all Varsity and freshmen candidates for the tennis team in room 10-275 at 5 o'clock. No Varsity tournament will be held this spring as the team will be picked by the results of the tournament last fall and from those of last year's squad. Everyone has a chance to secure positions on the varsity teams, as members of the squad will meet challengers for varsity berths. In this way a stronger team can be developed.

INSTITUTE MATMEN SECOND
(Continued from Page 1)

L. C. Brightman (B) threw L. B. Smith (H) in 10m 14s. with a front nelson.

One Hundred Thirty-Five Pound Class—Capt. H. J. Freedman (H) won referee's decision over S. K. Dickinson (B).

One Hundred Forty-Five Pound Class—Capt. T. B. Dunston (B) won referee's decision over George Karellitz (H).

One Hundred Fifty-Pound Class—Capt. Rock Hereford (T) threw Bau-

man (D) in 3m 55s using front body hold and scissors.

One Hundred Seventy-Five Pound Class—Bob Spellman (B) threw W. G. Cole (H) in 3m 40s using a front body hold.

Unlimited Class—Oberlander (D) won from T. Hoag (H) in overtime period with time advantage of 2m 53s.

Runners-up:

One Hundred Fifteen Pound Class—Milton Krook (H) won referee's decision over Brown (L).

One Hundred Twenty-Five Pound Class—L. B. Smith (H) won referee's decision over W. D. Norwood (T).

One Hundred Thirty-Five Pound Class—S. K. Dickinson (B) won referee's decision over Henrytta (D).

One Hundred Forty-Five Pound Class—Borglum (D) won referee's decision over George Karellitz (H).

One Hundred Seventy-Five Pound Class—Walt Kennett (T) won referee's decision over W. G. Cole (H).

Unlimited Class—T. Hoag (H) won referee's decision over Parkman Saybrook (B).

Final Score—Brown 13, Tech 13, Harvard 11, Dartmouth 8.

Referee—Arthur Mather.

Head Timekeeper—Dr. J. A. Rockwell, Tech.

WANTED

A man with real sales ability upon graduation this year to demonstrate and install high speed automatic addressing machinery used by publishers and in general offices. Success in this line will, in two or three years, lead to an unusually good sales position. In replying give age, family background, courses taken, grades made, organizations made (athletic, fraternal, religious, dramatic, literary, etc.), office held and whatever done toward self-support. Also state why you think you could make good in this position, and what salary you think a beginner should receive. Give at least three references for character, mental ability, mechanical skill, and so forth. The concern placing this ad is established and growing, has a high-grade personnel, is democratic in its opportunity and places its first emphasis on character and resourcefulness. Address Wm. Ayer McKinney, 6th floor, 817 Washington Blvd., Chicago, Illinois.

SIMCORE

TRADE MARK

Simcore wires and cables are made in accordance with the Code rules of the National Board of Fire Underwriters. Every completed length is subjected to voltage tests that not only insure superior quality but are a measure of that quality.
