FRESHMAN ARMY STARTS TRAINING

"Intend to Make Fellow Work" Major Patey States Emphatically

One more sign of military activity about the campus is the formation of the Freshman Army. The project was planned weeks ago and meets its first tryout on April 6 at 4:15 in Cambridge Hall. The plan is to have a body of men from the freshman "military" on the track to assist the younger fellows on the track. They will report promptly at the course of the relay race and assist in bringing the runners. The plans for the project were made by Lieutenant S. E. Crockett and others.

The Freshman Army will have a color, a flag which will be prominently displayed and will have a prescribed uniform which is to be worn by all members. The uniform will be a blue shirt, blue pants, white shoes, and a red tie. The flag will be carried by the captain of the Army and will be displayed prominently. The Freshman Army will be under the command of Lieutenant S. E. Crockett, and will consist of all freshmen on the faculty. The Army will be organized into two battalions, the first battalion to consist of all freshmen on the faculty, and the second battalion to consist of all freshmen on the faculty except those who are members of the first battalion.

The Freshman Army will hold its first meeting on April 6 at 4:15 in Cambridge Hall. The meeting will be open to all freshmen on the faculty, and all freshmen on the faculty are encouraged to attend. The meeting will be held in the Cambridge Hall, and will be conducted by Lieutenant S. E. Crockett. The meeting will be preceded by a brief talk on the history of the Freshman Army, and will be followed by a brief talk on the organization and duties of the Army.

ACTIVITY HEADS CONFERENCE

that structure would have to be expanded. The president declared that during the basketball season the expansion would be necessary. The president also stated that the structure would be expanded as soon as possible.

F. G. HARMON '23

Students have been busy planning the Water Gym, which is to be opened at 6:30 p.c. tomorrow. The plans are for a large attendance.

tRunkle this afternoon at 5 o'clock.

Student Gets Sanitary

"Which arm do they do it on?" Dr. G. F. Croke asked some students as he walked along the hall.

"It is hoped that all problem were worked out and to arrive at a solution." Dr. Croke said.

The average man's arm is short, thick, and heavy, he said, and the average woman's arm is long, thin, and weak, the latter being more harmful.

J. M. BOWER TELLS "ACT OF STUDYING"
