

"YOU'RE TRAINED FOR BIG FIELD" SAYS M. C. BRUSH

Hog Island Expert Tells Professionals They Will Have Many Opportunities

HOPES AUDIENCE WILL DO ONE THING BETTER

"Years Between 20 and 30 Are Most Important—Diploma Means Much at First"

"For men of your training there never was a field as big as that during the next few years—if you are thoroughbreds." This was the parting message of Matt Brush when he spoke at Walker to the Combined Professional Societies on Wednesday night.

At the beginning of his talk Mr. Brush said, "If every one of you does not do one thing differently for my talk tonight I will have wasted my time. I am not talking for fun and no long rectangular green stuff is going to come in but if you do some one thing better I shall not have made the trip in vain."

"What ever you do, do it 100 per cent, don't just put in time. . . . If you are going to get soured do a finished job or if you study work like hell."

He outlined the essential differences that Technology training produces in a fellow in that "he is accurate, resourceful, has the power of analysis and concentration, and the ability to learn."

In discussing the relations of men and their employers he said, "If you once disappoint your superior he never has the same faith in you that he had before"; also, "you must be a good boss picker as well as a good job picker. Use your noodle; your brain is something more than a knot to keep your spine from unravelling."

Diplomas Get Men Jobs

In his mind, the time that is most important to a young fellow is between the ages of 20 and 30. "Put in 26 hours out of the 24 when you are between 20 and 30 and then you will be in a place to clean up the town after that. It used to be that it took a pull to get ahead but now it takes a head to get a pull. A diploma from Tech means a lot when you are getting a job but after you have the job you must qualify; don't think that you can ride on the diploma because you can't."

RADIO HAMS FLOCK TO MEETING HERE

Fourth Annual Convention Draws All New England Crowd to Walker Tomorrow

Coming from all over New England, radio amateurs will gather here tomorrow at the Fourth Annual First District Radio Convention and Banquet. Many of them will see for the first time those with whom they have often talked over the ether.

At 1 o'clock the Manufacturers' Radio Exhibit will open in the Walker gym. There will probably be about fourteen exhibits, featured by antique and experimental apparatus. Many old relics of the early days of wireless will be dug out from their accumulated dust and placed on view to make present day amateurs marvel at their crudity. Also during the afternoon there will be a traffic convention, at 3 o'clock, called by Irving Vermilya, traffic manager of the first district. Admission to everything during the afternoon is free. The M. I. T. Radio Society's station will be open to visitors all the afternoon.

At 6 o'clock the annual banquet will be held in the main hall of Walker. This will be followed by speeches by

R. S. Sammond '26 Dies

Robert S. Sammond, a member of the freshman class at Technology, died of pneumonia early yesterday morning. He was removed to the hospital in the middle of last week and was then very seriously ill. Sammond was a member of the news staff of The Tech and came here from New Britain, Conn.

Dormitories Suggest Three Changes After Taking Constitution

Want Clause on Exclusion of Women in Lease—Decision Rests with Board

The dormitory constitution was read and accepted, at a meeting of the dormitory Seniors held in the reception room of Runkle hall, Wednesday evening. After the reading of the constitution a general discussion took place and it was decided to recommend to the Institute Committee the following changes:—

1. That the house rules, which are at present a part of the constitution be taken out of the constitution and made a part of the by-laws.

2. That the following house rule: "Women shall not be permitted in the dormitories until a suitable reception hall is provided and then only under regulations to be decided," be taken out of the constitution and made a part of the lease.

3. That the dormitory board be urged to divide the rooms in the dormitories as evenly as possible between the four classes, and that graduate students be excluded.

Besides these suggestions others were made for the betterment of the dormitories. R. P. Shaw '23, temporary chairman of the dormitory committee, presided at the meeting.

Ford Opposes Second Change

Professor L. F. Hamilton '14, chief of the dormitory board, when told of the resolutions yesterday afternoon, said, "I have no comments to make, since an official copy of the rules has not yet been sent to me. When I receive it, Mr. Ford and I will confer (Continued on Page 4.)"

DR. STRATTON BACK FROM SHORT TRIP

President Gets Acquainted with Schenectady Alumni—Will Visit Chicago Next

Dr. S. W. Stratton is expected back this morning from a short visit to Schenectady. He left for that city last Monday night and addressed the alumni there yesterday. The new president is also planning a slightly longer trip for next week and may possibly decide to take another later on in the spring.

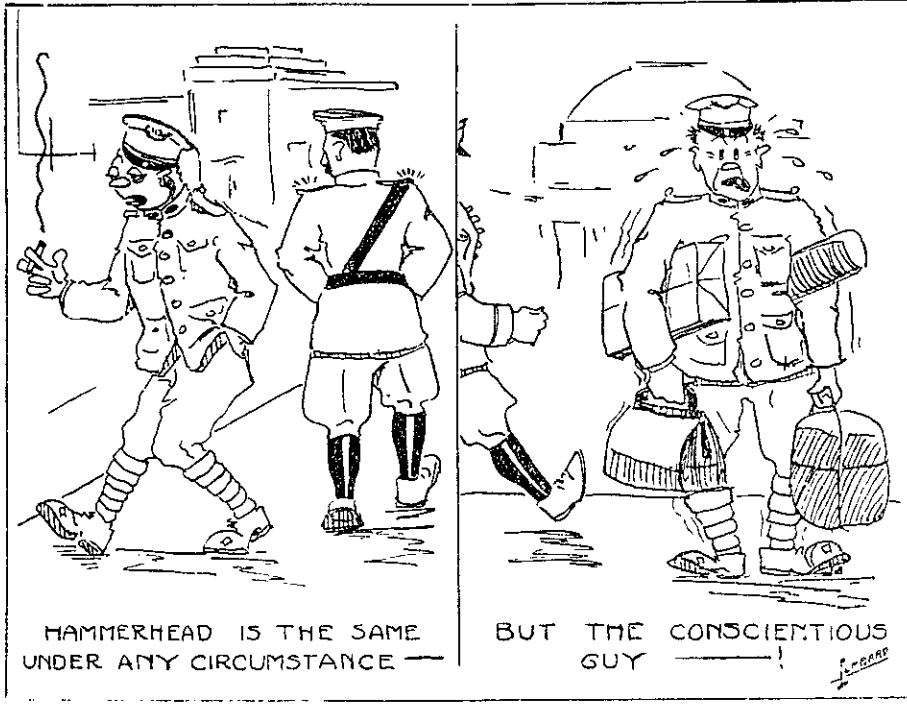

His purpose in making these trips is to become acquainted with some of the alumni throughout the country, and to give them a chance to get to know him. Dozens of Technology alumni clubs want to have Dr. Stratton address them, and letters asking him to do so have been coming in daily.

Carlson Goes with Him

On his trip next week Dr. Stratton is scheduled to leave Tuesday night for Chicago where he will address a gathering of alumni on Thursday, April 5. That night he will journey to Pittsburgh and speak to its Technology graduates on Friday. Saturday he plans to address Institute alumni in Rochester, and thence to come back to Boston, arriving Sunday, April 8.

It is believed that H. J. Carlson '91, president of the Alumni Association, will accompany Dr. Stratton to Chicago, and will go from there to Indianapolis, at which place he will address a meeting of alumni.

WAR IS JUST WHAT SHERMAN SAID—FOR SOME

FACULTY WANTS TO DON FORMAL DRESS

"No Doubt About 1923 Wearing Caps and Gowns" Says President R. P. Shaw '23

The long drawn-out discussion on the wearing of caps and gowns at graduation this spring was essentially brought to a close Wednesday evening by the decision of the Faculty to wear academic costume.

By a very large majority it was decided that much would be added to the impressiveness of the ceremony if those concerned appeared in caps and gowns. Professor E. F. Miller '86, chairman of the faculty, remarked yesterday that he had observed during the last few years a tendency away from the so-called rugged simplicity which came perilously close to being drab and flat.

R. P. Shaw '23, class president, stated last night, "In order to clear up any doubt which may exist concerning the wearing of caps and gowns, I might say that the Senior class certainly will wear Caps and Gowns at commencement." The occasions upon which they will be worn are class day, graduation, inauguration, and pops.

Part of faculty reorganization adopted at the meeting Wednesday provides for a sub-committee to the Faculty Council which shall serve with representatives of the Alumni Council and of the undergraduates as a joint committee on graduation exercises and Senior Week. This places Senior Week upon the same basis as Junior Week, and since the faculty has always actively co-operated in making Junior Week arrangements, Senior officers expect this committee to decidedly influence plans for commencement.

Dance for Friendship

The Walker Memorial Committee will run a dance on Saturday, April 7, from 3 to 6 o'clock, to benefit the Student Friendship drive which is being held in most colleges. The orchestra has not yet been chosen.

New Salute Ruling Gives Surprise to Official Institute

No Decision on Returning Acknowledgement—Major Putney Not Sure Rule Will Work

"Each student in uniform will salute the President of the Institute, the Dean, and the head of his department in the prescribed manner when on the Institute grounds and outside of the buildings."

"Salutes will be exchanged under similar conditions between students in uniform and officers of the army in uniform."

The above is taken from General Orders No. 4, issued last Friday by order of Col. F. W. Phisterer, head of the R. O. T. C. at the Institute and is the most recent of the Military Science Department.

Sets New Custom

Neither the President's nor the Dean's office had knowledge of the order previous to its issuance, and it was as much of a surprise to them as to the rest of the student body. One individual wondered if it was customary to render such salutes at other colleges, and it was found from Major Putney that it is at some few.

It is a new custom at Technology for there is only the slightest resemblance in the old habit of the Institute students to tip their hats to the President whenever they happened to pass him in the halls.

Opinion on Ruling Varies

When questioned about the new order, Major E. W. Putney, executive officer, said that the department had issued the order because it believed that the men mentioned were entitled to some form of recognition by the students and since the salute is the military form of courteous acknowledgment of rank, those dressed in the military uniform will be obliged to render this recognition according to regulations.

Opinion among those to be saluted seems to be divided as to the wisdom (Continued on Page 3.)

18 Entitled to Salute

For the convenience of those who are anxious to salute everybody entitled to receive one, the following list is published: Dr. S. W. Stratton, Dean H. P. Talbot '85, and Professors William Emerson, S. C. Prescott '94, W. K. Lewis '05, F. G. Keyes, C. M. Spofford '93, D. R. Dewey, D. C. Jackson, H. G. Pearson, G. W. Morse, H. W. Tyler '84, E. F. Miller '86, E. W. Putney, Waldemar Lindgren, Frank Vogel, J. R. Jack, and C. L. Norton '93.

"Everything Tentative" Says Dorm Chairman

When interviewed yesterday evening, J. W. Rollins '78, chairman of the committee which is considering the extension of the dormitory system, said, "Everything at present is only tentative and I cannot say anything definite." He thought that the dormitories when built would be of a different type from those already up and that they would in all probability follow the tentative plans that have been drawn up. He also said that within the next month something definite could be said regarding the dormitories.

SWEEPING FACULTY REVISION IS FIRST ACT OF PRESIDENT

Creation of Council, at Meeting Wednesday Night, to Simplify Matters of Routine

ABANDON 11 FACULTY STANDING COMMITTEES

Nine New Committees Will Be Elected Annually—Council Rules on All Detail

At the suggestion of Dr. Stratton, a sweeping reorganization of the faculty was arranged at the faculty meeting last Wednesday night. Much dead timber has been cleared away by the elimination of superfluous committees, and the handling of faculty business has been greatly facilitated by the creation of an executive committee, the Faculty Council, which will act on all matters of routine. The new system is modeled somewhat upon the student government at the Institute.

The reorganization was effected by the adaptation of the report of a special committee of nine professors appointed by the President. Eleven standing committees of the faculty have been abandoned, their duties being performed under the new arrangement by the Faculty Council.

Will Have Unlimited Power

This body will consist of the President, Dean, Chairman of the Faculty, Secretary of the Faculty, Director of Summer Session, and the heads of departments and courses. It will possess almost boundless power, bringing before the faculty as a whole only questions "which the Council feels are of sufficient importance for the consideration of the entire faculty." The records of the Council will be reported to the faculty.

A sub-committee of the Council will be appointed by the President to serve with Alumni and students as a joint committee to supervise Senior Week and the graduation exercises. Another sub-committee will direct administrative affairs such as tabular view and room scheme, conduct of examinations, publications, registration, etc. Under the old system, there was a standing committee of the faculty to look after each of these.

The new standing committees are nine in number and, in general, are elected annually by the faculty. There remain committees on admissions, petitions, scholarships, undergraduate and graduate courses, provisional students, and on first, second, and third year students.

T. C. A. CABINET ELECTS NEW OFFICERS TONIGHT

The cabinet of the Technology Christian Association will meet in the front office at 5 o'clock tonight to elect new officers from the eight men recently nominated.

The men being voted for are as follows:—for president, W. W. Quarles, Jr. '24, A. W. Rhodes '24, and J. E. Jagger '24; for vice-president, Denton Massey '24, W. W. Quarles, Jr. '24, and A. W. Rhodes '24; for treasurer, W. H. Corrales '24, and R. L. Holt '24.

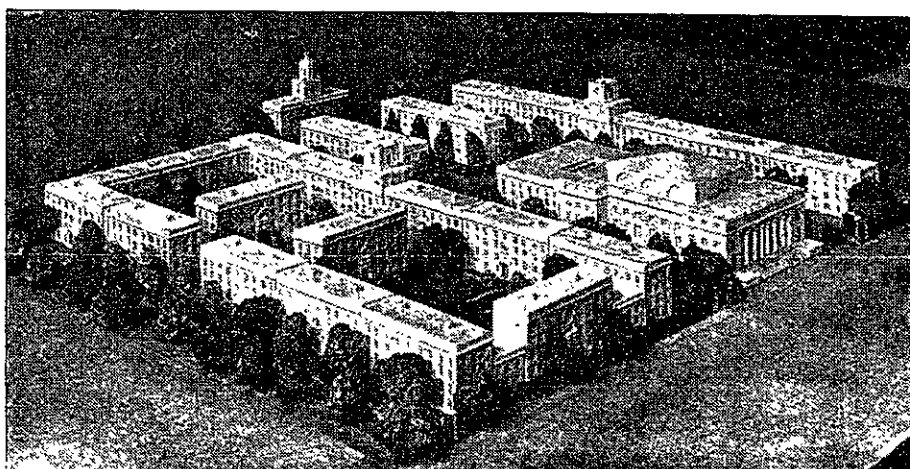

Fire Engines, But No Fire

Much excitement was caused yesterday forenoon by the appearance on the drill field of a hook-and-ladder truck and a steamer, both of which quickly disappeared around the corner of building S. There was no fire at the Institute, however, and the apparatus was simply returning from answering an alarm turned in from the L. E. Knott factory back of the dormitories. There was no fire there, either, the alarm being turned in by the bursting of an automatic sprinkler.

CALENDAR

Friday, March 30
5:00—Meeting of the present cabinet of the T. C. A., front office.
7:30—Signal Battalion smoker for sophomore electricals, north hall, Walker.
Saturday, March 31
1:00—New York City Club meets in Faculty and Alumni room, Walker.
1:45—Outing Club meets at North Station Information Bureau.
2:00—Chess Club meeting, Faculty and Alumni room, Walker.
3:00—Tech Show rehearsals for cast, chorus, and orchestra.
6:00—Radio Society banquet, north hall, Walker.
Tuesday, April 3
6:00—Stylus meets in Walker, supper following.

ORIGINAL DESIGN FOR DORMS NOW OBSOLETE

THE picture shows a model which was the latest thing in Technology dormitories last spring. Since then the plans have been violently changed. At the alumni meeting on Monday night it was disclosed that the dorms will not be built around Walker, as shown. Yesterday J. W. Rollins '78, chairman of the alumni committee, said that the form of building pictured has also been put in the discard.
