Lack of Contests in Can Technology Continue to Meet First Class 
College Opponents?

THE TECH

In the last issue, Dr. Rushwell de- 
scribed the new Contest System, 
which has already been favorably 
advocated by the Council on Athlete 
Institutions. He referred to the in- 
policy of competing with the strong 
men from other Universities. 

Walter Camp's advice on the mat- 
ter is discussed in this week's 
Revolving:

"If you want to make men of those 
boys, you must do it with a fi- 
k of spirit, and spirit is not the 
spiritual wealth you want, the 
spirit that wins the strong men 
with the strongest teams, because 
the individual to be able to face like 
the man that one of the best of the 
ity, if the circumstances, 

But what do you consider the es- 
cents of the objectives of the meet which is constantly do- 

The Tech Executives in charge of the 
year-end events of the upper class 
rooms before us in the spring of 
the Academic Year, the execu- 
ents in charge of these events, 

A GOOD IDEA—BUT IS IT POSSIBLE 

THIS term the Electrical Engineering Department initiated the 
practice of securing outside lecturers to help Tech students, 
F. B. L. has been the man selected for this new duty. 

At Tech, of all schools, is most vital that the undergraduates 
play the leading role. The making of a great institution of the 
tory, the most important thing in education, is con- 
siderably vocal. Wholehearted credit to the Electrical Engi- 
neers who have recognized the significance of this fact.

But it seems that the experts who have analyzed this problem for 
the big, full-blooded game, the need for the real team. The account 
in these lectures has been thorough and detailed, and has 

A good man who is carrying a course of extra-curricular activity 
would doubtless be much interested to know that he would have his 
Appointments during the next week. He was to stop over 
into the notebook the gist of the text assignment. He would 
doubtless be interested in the fact that the manuscripts were not 
breathlessness, tell him how he can get his applied problem 
done in half the usual time without sacrificing the work. What Tech- 
students want most urgently, is to find how the time which 
semblies to devote to books, can be cut down, not how it might be 
increased. Twenty or more hours a day in which to meet and 
requirements under present conditions.

A NEW BUT VALUABLE ACTIVITY 

The first step toward a permanent debating team was taken last 
month, when the Cecil Johnson Fund was organized. The purpose 
may have a place in the field of intercollegiate debate.

This innovation is promising for two reasons. First it will provide a new opportunity to develop oratory, and gain the confidence in public appearance, which is so necessary to success in life. Second, it will broaden the field for Tech men to match their wits with undergraduates of other colleges, and prove their ability to compete not only as scientists and athletes but scholars as well.

Seniors Anticipate June 

Since the first of May, college campuses throughout the field 
have been decked out with festoons of red, white and blue, and an 
arrayed in academic costume. 

But at Brown, the Senior class is looking forward to its last 
month. The Senior class is in the full splendor of its capa and gowns, and not long seen around Har- 
vard yard, it is a tradition at the 
university to present the Senior Class 
regally every morning during the 
month of May. At Brown, the Senior class is being 
visited in the establishment of the Senior class. The 
groups to chapel and morning 
sermons during these last few weeks at Brown are wearing academic 
eight and will wear academic gowns 
in all campus activities from this 
month. Brown is the next of the 
university that the grad- 
uates will be recognized by some 
where in the academic world. 

Col. Huntington: "The Lucky One." 

The Senior Class this year seems to be revolutionizing the usual 
ritual of the last month. At Brown, 
this has been the result of a 
class interest in the Senior Class, and in the active interest of the Senior Class. 

The Senior Class this year seems to have adopted a 
revelation to the Brown students. At Brown, 
this has been the result of a 
class interest in the Senior Class, and in the active interest of the Senior Class.
