CONCERNING AN OLD SAYING

It is an old saying that if you wish to become acquainted with a boy, write him a letter. Technically, this saying has been formulated and unformulated in the minds of the students here at the Institute during the past 2 years or so, but in the minds of the students near and far during the past 20 years or more. The way this saying has been employed is simple. The boy is to be the student, and the letter is to be the day's events.

Dear Friends,

The purpose of this letter is to acquaint you with a boy who has lived in the Institute for the past 2 years. He is a member of the Class of 1925, and has been attending classes here for the past two years. He is a very good student, and has made excellent progress. He is also a good athlete, and has been a member of the track team for the past two years.

The Institute, which is a very important institution in the world of education, is located in the heart of the city. It is a very large and beautiful building, with many classrooms, laboratories, and libraries. The students are very well educated, and are very interested in their work. The faculty is very good, and are very interested in the welfare of the students.

Sincerely yours,

JOE RAY RAYS
RESURFACED TRACK

Work This Summer Makes
Track Again One of Best in New England

Track Field presents a changed aspect this fall, with the new material laid around the track to replace the old sand. In past years, the track has been used for track meets, and also for cross-country races during the winter months. This year, the track will be used exclusively for track meets, and will be in excellent condition for the season.

Ted Walker, the new "track coach," has given a great deal of time and energy to the development of the track. He has worked hard to get the track in top condition, and has made many improvements.

The work of rebuilding the track was started in the spring, when the old sand was removed and replaced with a mixture of loam and fine cinders. The surface was then smoothed out, and the track was laid down in its present form.

This year's track team will be under the direction of Ted Walker. The team is composed of many fine athletes, and is expected to do very well in the coming season.

The new track, which was laid down in the spring, has already been used in many track meets this year. The students are very pleased with the new track, and are looking forward to many exciting meets this season.

Ted Walker, who has been coaching the track for many years, is well known for his ability to develop fine athletes. He has coached many top-class athletes, and has helped many of them to success in track and field.

Sincerely yours,

DEAN BURTON TAKES
ECLIPSE PICTURES

With British Scientist Observes
Moon's Shadow in Footage of Phoenomenon

During the recent eclipse of the sun, the late A. E. Morgan, of London, secured the perfect photograph of the phenomenon. The eclipse was observed at the coast of California, and the photograph was taken from the top of a mountain. The photograph was made with a special camera, and was developed immediately after the event.

The eclipse was a very unusual phenomenon, and has been studied by scientists for many years. It is believed that the eclipse will provide valuable information about the sun and its surroundings.

Sincerely yours,
