CHEMISTS INSPECT THE BEACON OIL REFINERY

The research committee of the Chemistry Society of the University has recently made a visit to the Beacon Oil Refinery. The purpose of this visit was to gain a better understanding of the processes involved in the refining of petroleum products. The students were shown various stages of the refining process, from the initial separation of crude oil to the final production of refined products. The tour was conducted by a member of the refinery staff, who provided detailed explanations of each step.
