MUSICAL CLUBS RETURN FROM CHRISTMAS TRIP

(Continued from Page 13)

colored. The Dippy-Daisy Duo went over better than it ever had during the season, and they found their box office "laudable and sound.

The dance was returned to the school gymnasium, and was rather crowded. The floor was warped, and the dance only lasted until 12 o'clock. However, the enthusiastic reception and warm hospitality shown the men more than made up for the disappointing dance.

At 1 o'clock Saturday afternoon the men boarded their special car and traveled to Providence. One of the almost in charge of the concert met the men in car, and took their luggage to the Office. The Tech (Christian Association) Harvard Co-operative Society Returned by Special Car

We are the OFFICIAL JEWELERS of the Harvard Co-operative Society Special Discounts on DIAMONDS, WEDDINGS, JEWELRY, SILVERWARE, FURNITURE, PETS, SILVER CUP, CASE, ALL DESK, EVERYTHING POSSIBLE THOMAS LONG COMPANY at SUMMER STREET

A NEW Finish for Industrial Purposes

CHEMISTS of the duPont Company have perfected during the past year a new finish for wood and metal, radically different in basic materials and revolutionary in results.

The new product, sold as Viscolac, clear, and Duco Finish, enamel, has made a remarkable impression on the automobile and furniture industries. In other miscellaneous fields where the highest quality finish is desired, Viscolac or Duco Finish have been adopted.

The new finishes are made on a pyroxylin base from purified cotton properly dissolved and combined by chemicals. The solvents used evaporate rapidly, making these finishes the fastest in the world. The result is hard, tough, elastic and absolutely waterproof. In actual use it has been shown that Viscolac and Duco actually improve with age. They cannot crack, craze or lose the usual finishes. Their hardness prevents them from being easily scratched or marred. Colors do not change with outdoor exposure.

Briefly, the duPont Company feels it has reached the goal towards which every finish manufacturer has always aimed—beauty plus durability in a finish.
