MASSACHUSETTS INSTITUTE OF TECHNOLOGY

THE SENIOR ENDOVMENT FUND

To the Class of 1923 is due the credit for the idea of a Senior Endowment Fund. Its efforts will be little alike, however, unless the policy it originates is adopted universally by other classes. It has cost about ten thousands dollars in the form of endowment and is growing. The Endowment Fund idea hoped would some day be atone.

There is no more effective method of charting the future of the Institute. The Endowment Fund is a part of the Institute which we have received our education for its existence. If outsiders who have not heard about the Institute can gain a part of the spirit of MIT, which we should develop, it has not yet perished.

There is no institute in Boston that is better fitted to train leaders of industry. The Endowment Fund is a part of the Institute which we have received our education for its existence. If outsiders who have not heard about the Institute can gain a part of the spirit of MIT, which we should develop, it has not yet perished.

The Institute does not stand alone in having a definite building scheme for the future. Yale University recently announced a building scheme for the future. We are not alone in having a definite building scheme for the future. The Institute does not stand alone in having a definite building scheme for the future. Yale University recently announced a building scheme for the future. We are not alone in having a definite building scheme for the future.
