CIVILS TO VISIT AMOSKEAG PLANT

New Hydro-Electric Station and Dam at Manchester, N. H.

Plans have been made by the Civil Engineering Society for a trip to the Hydro-Electric Station and Dam at Manchester, N. H. In order that the trip may be an educational one, members of the Society are urged to meet together at 11:00 A.M. on Tuesday, April 14, at the entrance in building 1. The trip will probably last approximately three hours, during which time the group will be allowed to pass through the different sections of the dam.

The plant is comparatively new and is located on the Amoskeag River, and is a total of 35,000 H. P. capacity. All members of the Society interested are urged to attend.

Other Activities Planned

The officers are also planning a trip to the new construction work of the Public Utilities Commission. A trip to this location is expected to be made on Wednesday, April 15, and the members of the Society are requested to meet together at 11:00 A.M. in building 1.

TELEPHONE REPRESENTATIVES

Representatives of the A. C. T. will be on the Rosenblum's Corner, 5908 Main St., from 1:00 to 5:00 P.M. daily, for the benefit of the Society.

The representatives will give the students (in all cases) the highest grade of Co-Operative work that can be obtained. All students of the class of 1925 and all members of the Civil Engineering Society are requested to attend.

Army Vacancies

Examinations are to be held during the week of April 14th, which will determine the eligibility of students for the Extra Army. A group of examination will be held in the School auditorium at 8:00 P.M.

R. O. T. C. CAMP

All members of the class of 1925 are requested to report to the R. O. T. C. Summer Camp, which will be held in the School auditorium at 8:00 P.M.

CHEMISTS INSPECT REFUGEE SHELTER

Guides Explain All Processes in Production to Visitors

Approximately twenty-five members of the Technology chemical society visited and were shown through a large plant of the United States Steel Corporation, to become acquainted with the chemical processes.

T.C.A. DEPUTATION TO GO TO DUXBURY TODAY

A deputation consisting of Dolan, President Stratton, and four other members of the Club will leave Boston today to Duxbury to speak to the students on the subject of "Technical Education and Its Application to the Life of the College." The deputation will consist of Dolan, President Stratton, and four other members of the Club.

Miners Hear Talk on Explosives at Smoke-Filled Meeting

Five thousand dollars in (labor notes were won yesterday at the Second Annual Duxbury Mining Club, sponsored by the company and held at Walker hall, last night. The subject of the meeting was "Explosives for Mines." The winning price was $5,000, of which $500 was paid in cash and the remainder in mining stock. The meeting was well attended and the discussions were of great interest.

President Stratton Given Model of Ship

President Stratton recently received the model of a new luxury liner of the Great Eastern Railway, "The Flying Cloud," the largest ship being built in the world. The model represents a ship of the type which is expected to be completed in the near future. The ship will be a true replica of the actual vessel and will be used for the purpose of training engineers in the proper construction and operation of such ships.

The success of the model led to the production of the larger ship, and the ship will be ready for delivery in the near future.
