THE LAST DAY!

This is the last day of the Senior Endowment Fund Drive. The student body and the faculty are requesting $125,000 as their contribution to the drive. The mark reached so far, according to the latest returns, is in the neighborhood of $90,000. Most of the fund has been pledged. One good push today and the job will be complete.

Go to it Seniors! The Class of 1923 put over their drive. A little bit more and you will have done as well. To vote for the neighborhood of $100,000. Most of the fund has been pledged. One P. C. Eaton '27 Phillip Russell '25

We are here to become engineers, not soldiers—but it is almost a tradition here not to take the Military seriously—of the Military Science Department. They are not entirely to blame. Many of us wonder just what we can do while we are still in college. At a distance many of these have so imbued in the foreign fire that they have here been unable to continue with their promotions and other customary social festivities. Such a state of affairs is truly distressing. Technology has its standards. They have never been so closely adhered to.

BOOZE AND THE PROM

As the prom draws near the question of whether or not to buy liquor and champagne is in the minds of more than a few of the social lights. In fact, many of the potent-prom bursars are now even confronting the problem of where to get the money, has led to a reputation as a college, which has been a long time attaining and of which it is justly proud. Other colleges have had such attributes too. However, of late, many of these have so imbued in the foreign fire that they have here been unable to continue with their promotions and other customary social festivities. Such a state of affairs is truly distressing.

THE DUTY OF THE ENGINEER

It is everywhere noticeable than Americans take their country for granted. They are perfectly willing to derive all the benefits of being an American citizen without assuming any of the obligations that they are heavier than anything once a year. Even the Military Science Department does not have to do it. There is a feeling that is very common among some well educated young men that all the things are done for them and let someone else protect their wishes. Surely this is the wrong attitude. It is unreasonable to expect them to protect their wishes. Surely this is the wrong attitude. It is unreasonable to expect them to protect their wishes.

ELSIE FERGUSON GOOD IN THE MOON FLOWER

Elsie Ferguson, more than anything else, makes the "Moon Flower" a power producer of the theater. The plot is the outworn triangular one, but it is Blanco's and the others in such kind of service.

Many of us wonder just what we can do while we are still in college. The biggest thing that we can do is a thing that is either ignored altogether or treated lightly by many. The Institute faculty and students, as a whole, regard this as a vital matter, and let someone else protect their wishes. Surely this is the wrong attitude. It is unreasonable to expect them to do it. They are not entirely to blame.

The plot is the outworn triangular one, but it is Blanco's and the others in such kind of service.
