What du Pont Prescription Paint Service Means to You

1. Thorough knowledge of the paint requirements of your field. Knowledge of the causes of corrosion and decay of metal, wood, and concrete. Knowledge based upon practical research in your field, and field experiments covering a period of five years.

2. Ability, and the facilities to prepare the specific paints necessary to check rust, corrosion and decay under specific circumstances.

3. A service that sells not merely paint, but paint protection for every type of surface. A service that will prescribe the right paint to check rust on a small bridge, or evolve a paint standardization system for an entire industrial or mining plant.

In short, du Pont Prescription Paint Service means all that you want or expect it to mean—a statement backed by the du Pont reputation.

SIMPLEX WIRES AND CABLES
Insulated with rubber, cambric or paper

SIMCORE—National Electrical Code Standard. Every length is subjected to searching electrical tests to insure a first quality product. Ask for specifications.

CAOUTCHOUC—B. C. A rubber covered, braided wire insulated with a 30% Para compound. Send for specifications.

LEAD COVERED CABLES AND WIRES—For under-ground distribution where a conduit system is used.

STEEL TAPED CABLE—Used where a conduit system is not available. It carries its own conduit. Descriptive booklet upon request.

FIBREX TREE WIRE—For installation among trees or wherever chafing may occur. It is non-inductive. Send for circular.

SUBMARINE CABLES—For power transmission or for telephone or telegraph service. Our engineering department is always available for consultation.

SIGNAL CABLE—Dependable insulated cable for police or fire alarm service.

IGNITION WIRES—Used extensively, and with satisfaction throughout the automotive field.

TIREX PORTABLE CORD—For electrical tools and appliances. Rubber- armored, flexible. It cannot kink—and has the wearing qualities of an automobile tire.

TIREX LAMP CORD—A rubber armored cord for drop lights or table lamps, made in colors. Send for folder.

TIREX MINING MACHINE CABLES—Heavily insulated, rubber- armored, portable cables with the wearing qualities of a cord tire.
