NEW TYPE OF POLLUTANT ON MERCHANTS' LIMITED

We extend our heartiest congratulations to the New York, New Haven and Hartford Railroad, on the appearance of a new type of Pollutant. With the car or in a taxi on the streets, it is on the Merchants' Limited. Indeed we doubt who we should be traveling on the Merchants' Limited, or if it should be on our street line. The Merchants' Limited makes a fine ride, and we assure our readers a much more comfortable trip through the cold winds of December and winter South. Dark carpeting, contrasting plush with the lighter shades on the padding and seating (chosen by the latest approved psychological methods), and unobstructed aisles, extends the length of the aisle which is wide enough to allow a person to carry his suitcase without dislocating passengers), extends the length of the aisle that time a new method was worked out in addition to the improvements on the old one. Mr. Brian Mead and Dr. H. E. Gallogly, Research Associates in the department worked for some time on this method.

WANTS FUMBLE RULE TO BE CHANGED

Parley H. Davis, a former member of the Football Rules Committee, advocates a new fumble rule, similar to the one first used in a football game to give the defense a chance to recover fumbles. This feature of football is new, and if the new rule is adopted, it will give the defense a better chance to recover fumbles and prevent the offense from getting back the ball.”

CONSTRUCTION CORPS WANTS SUMMER COURSE

The Office of the Construction Corps of the Naval Academy is issuing a call for the enrollment of its regular students. The college is to be held in the summer months of June, July, and August. The students are to be enrolled in the course of instruction for the summer term, and the college is to be open to all freshmen. A. A. Dean, President, will be the principal of the college.

DANGERS OF ETHYL GAS MUST BE EXAGGERATED

Gas at ethyl gas is justified because it is in the course of being used by the research laboratories of the United States government. The Department of Agriculture has learned that for a period of time ethyl gas has been used in these laboratories. Ethyl gas is used in the research laboratories of the United States government. The Department of Agriculture has learned that for a period of time ethyl gas has been used in these laboratories. Ethyl gas is said to be a useful, and even necessary, substitute for coal gas in the research laboratories of the United States government. However, it has been found that ethyl gas is a dangerous substitute for coal gas in the research laboratories of the United States government.
