FIRST TRY-OUTS ON JAN. 9

In selecting men for the cast of "Dr. Stratton" which will be given by the 1925 Class on Saturday, January 30, the 1926 Freshmen Engineers, who are organizing the play, have a bit of preliminary elimination already started. The cast which will be put on Saturday is only a fragment of the total cast which will be presented later in the session. The parts of preliminary elimination consisted of a rather stringent halt of all the male students in the freshman class with a press sheet. The best, as well as men who were not chosen, were then permitted to enter the try-out room of the Playhouse. They were then divided into groups of about 12 or 13, and nine of the men were chosen for the major part of the cast of "Dr. Stratton." The result of the preliminary elimination will be made public later in the session.
