Societies elect representative

Browning to represent all institutes

Societies on institute committee

Harrington Browning, 23, president of the University of Virginia Engineering Society, expressed a desire to represent the University of Virginia in the election of the president of the individual societies held in the spring meeting. The president of the Institute of Electrical Engineers and the president of the individual societies held in the spring meeting as a result of the actions taken by the Institute Committee for the representation of the individual professor of physics at the University of Virginia. Before this action by the Institute Committee, the individual societies held in the spring meeting as a result of the actions taken by the Institute Committee for the representation of the individual professor of physics at the University of Virginia.

Will give physiological psychology test

A psychological test will be given to all students present. The examination is controlled by the same person and is the same as the test used in the past and usually requires about a minute. In the past, the test has been given several times in the past.

Second aldred talk of this year Friday

S. P. Bush will speak on "The Engineer in Industry"

Senior and graduate students will hear Mr. S. P. Bush, vice president of The Buckeye Steel Castings Company, deliver a lecture on "The Engineer in Industry." Mr. S. Bush, who received his first M.S. degree from the Institute in 1910, is the president of the company, "The Engineer in Industry," and industrial engineer of The Buckeye Steel Castings Company. He is a graduate of the University of Michigan and has had extensive experience in the field of engineering. Mr. Bush has made a special study of the subject of the lecture and has prepared a lecture to be presented at 3 p.m. in the Central Laboratory.

Test of dynamometer interests students

An attraction dynamometer, a device for measuring tension, will be installed in the central laboratory. This device, a project of the Institute of Electrical Engineers, will be used for measuring tension in various materials. The instrument is designed to measure tension in a variety of materials, such as wood, metal, and rubber. The dynamometer will be used to test the strength of various materials in a variety of applications. The device will be equipped with a control panel and a digital readout.

Coat missing after frosh chemistry lecture

Another instance of coat theft is reported at the University of Virginia. A frosh was noted by the police to have lost his coat, cap, and glasses at a chemistry lecture. The coat, cap, and glasses were returned to the owner within a few hours. The owner expressed his gratitude to the police for their prompt action.

Faculty undecided on two term plan

Question may come up at meeting on December 10

At a faculty meeting on December 10, the Department of Chemistry will discuss the possibility of a two-term plan for the next academic year. The question of a two-term plan has been under consideration for some time, and the Department of Chemistry is seeking the opinions of the faculty on the matter.

Juniors are slow in getting nominations

Papers of candidates for prom committee due soon

As yet not much interest seems to have been shown by the Juniors in the matter of getting nominations for the prom committee. The Juniors are to be reminded that the deadline for the submission of nominations is December 1, and that the committee will meet on December 2 to make its selection.

President Stratton is at the Garfield Hotel

Dr. Stratton, taking time enough to see the local dignitaries and to see that all the bulletins had been very encouraging, will return to the Institute on the 5th. He placed 1, 2, and 3 in order of the courses he taught, the Physical Science of the Institute.

Health of President continues to improve

President Stratton is recovering rapidly and his condition is said to be improving steadily. He is expected to be back in full health in a few days. President Stratton is expected to be back in full health in a few days.

Calendar

December 3

Christmas cards and other gifts should be mailed to the students at the University of Virginia by December 10, in order to reach them in time for Christmas. The cards should be mailed to the students at the University of Virginia by December 10, in order to reach them in time for Christmas.
