**PROFESSOR SUGGESTS CROSS WORD COUTES**

The bar of the cross-word puzzle has ascended the professors in Franconia as well as the students. Professor F. L. Shuler of the English department has suggested that the working out of cross-words is a very good way of training logic, as well as good practice in figuring. The students are now engaged in setting up a regular course for which only those who have taken the course in logic are eligible to graduate. Professor Shuler has suggested that the working out of cross-word puzzles could he done as a regular class and that it could he considered a regular part of the course. He has written out a collection of cross-word puzzles which he intends to circulate about the college, and that working the out of cross-words is a very good way of training logic, as well as good practice in figuring. **ANOTHER TECHNOLOGY CIRCUS**

**Machinery**

**was set in motion at the Institute Committee meeting yesterday for a Technological Circus this year.**

**The last circus was held the year before last, and proved highly successful. This form of all-technology celebration is valuable as a unifying influence, gaining as it does, the interest of every class. The generally hilarious atmosphere of the circus, and the many and diverse opportunities for competition and originality have in the past proved a potent means of creating spirit.**

**A circus is one thing about which the circus which is objectionable, and that is that it is apt to be hard on the main hall of Walker. In view of the recent action of the hall, it would be parasitic upon and deplorable if any harm could come to the new interior as a result of it.**

**Professionally conducted, the circus should not be a cause of injury to the hall, only the damage to the puzzles.**

**Though the circus will not be until next term, it is not too soon to plan.**
