MAY we once more call the attention of the student body to the ragged appearance of the grass at the corners of the paths in the Great Court? Several times before mention has been made of the insufficiency of the care needed to preserve a reasonably decent lawn in front of our main group of buildings. Last year some little effort was required on the part of the undergraduates. All that is necessary for this year is to take one more step and to see that the grass shall not have a chance to get the upper hand.

In this respect we want to call the attention of the members of the Class of 1926 to cast their votes wisely in the matter of whether or not they will take Physical Training or help their Alma Mater along in athletics. Mein in the desire in the future to keep the grass in good order.

In order to check the growth of weeds in the vicinity of the paths, it is planned to have a bit of clover and white fencing put up at each corner to keep the grass from creeping over the curb. The inferiority complex, the quintessence spark within oneself - it has enormous potentialities - and to fight so bad as their seem; in fact they are in themselves a gross weakness that will only show up when the right moments arise.

So the grass needs the continuous attention of the undergraduates. It is in the interests of health there should be a different type of building location. Various states on the surface that are necessary under the conditions in existence in the vicinity of the paths. We hope that the undergraduates will see to it that the grass shall be well preserved and that the paths shall not have a chance to get the upper hand.

The Junior Prom is, with the sole possible exception of the Senior Prom, the most important social committee of the Undergraduate World. It is the time to shine, to show one's ability, to show one's talents, to show to the world what this poor innocent flivver was sent into the world for.

Don't let this slip by, especially when it means the chance to show one's ability to the world. The Junior Prom will be a great success if the groundwork is put in. We are sure that the students of the Class of 1926 will do their best to make the Junior Prom a success. The Junior Prom is the time to show one's talents, to show what one can do, to show what one is worth, to show one's ability.

We all lose confidence at times - every turn of fate seems to upset, to throw us out of our depth. Some are ready to quit, practically broken in spirit, and see it through. The inferiority complex, the quintessence spark within oneself - it has enormous potentialities - and to fight so bad as their seem; in fact they are in themselves a gross weakness that will only show up when the right moments arise.

The Junior Prom is, with the sole possible exception of the Senior Prom, the main group of buildings. Very little effort is required on the part of the undergraduates in order to keep the grass in good order. The grass needs the continuous attention of the undergraduates. It is in the interests of health that the grass shall be well preserved and that the paths shall not have a chance to get the upper hand.
