How chemical control insures du Pont quality

DU Pont explosives do just what is expected of them—every time—because they are adapted to every blasting requirement and always of uniform quality. To ensure that Du Pont explosives are of the highest quality, the Du Pont chemical engineers watch every manufacturing step. By the careful selection of all materials, Du Pont has complete control of every stage of production, the unvarying Du Pont quality is assured. It is the maintenance of the uniform quality that has given the Du Pont Company its reputation today in the explosive field.

Certainty in blasting results is obtained by the selection of the right type of explosive and its proper use. Don't fail to send for your free copy of "Blaster's Handbook," an authoritative work describing the practical methods of using explosives in every field. This book will be invaluable in both college work and your reference library.
