New Book Listing
Superstitions Of Colleges Appears

The new book by Professor A. T. Meserve, "Superstitions and Social Continuities," which is due for publication in April, is a detailed account of college superstitions conducted by Professor Meserve. The book is richly illustrated from sources and themes written about superstitions.

"The book is an interesting read, and it's great to see how superstitions have evolved over time," said Professor Meserve. "It's fascinating to see how certain beliefs have persisted for generations, and how they have been incorporated into everyday life."
