**Ball Players Go**

**Long Period of Indoor To End This Afternoon With Out Door Batting Practice**

While waiting the day when the diamonds will be ready for play, the Beaver nine is working out nearly every afternoon in the Hangar Gym under the tutelage of Luke Manning. A large squad of pitchers and one baseman is practicing since the official opening of practice at the baseball meeting about three weeks ago and from present prospects Manning will have a string of first rate pitchers to take Tommy Fitzgerald’s place on the mound.

Practice to the present state has been confined to battery work, with two pitchers warming up their arms so much that they don’t need any “gloves” in the cut-off when pitching practice continues next term in the rain has been going on and taking it easy in getting their wings in condition. Today the team will go outside for their first of the season.

First Game on April 17

The second member of the pair has left the gridiron and will thus be able to give a good mark to the battery work being done in the Hangar and batting practice will be carried on by the single baseman, Wednesday and Thursday afternoon at the Hangar Gym.

Although four or five practice games have been played so far the basemen have not had a chance of catching. Many mistakes have been made in the Hangar practice already. Just how good they are is a question—until they become experienced in catching the ball. Through-out the season we will be unable to fully report their progress as they have been in the Hangar and not under the management of the Beaver team.

The regular intercollegiate season will start this year in the New York State League and although the Beaver nine will be playing in this league next year this present team will not be around next season so far as the regular team is concerned.

The Beavers have been scheduled to meet the Pioneers from Troy and Rutgers, but there has been no communication about a meeting with the former team. It is possible this meeting will take place later and there is no telling when the team will be out in the New York State League.

The schedule has not been changed to any extent so far and the whole team will not be around after the first three weeks due to the players that have signed contracts for the New York League.

**Young Men's Topcoats**

In Settled Spring Styles

When a young man takes to heart that he cannot afford to continue for another year without some winter wear, there is no reason why he should be without necessary protection against the weather.

Who can choose a Topcoat equal to the square shoulders of youth?—and who can show anything in the way of Topcoats equal to those exhibited by Scott's?

The burning question we like to see burn into a young man's mind.

**BILLY HAINES ROWS IN EIGHT IN ORDER TO DETECT FAULTS**

Engineer Coach Finds Number 2 Good Point for Observation

VARSITY PRACTICE TODAY

In order to learn more of the possibilities of the present eight-oared crew on the Varsity eight, Coach Bill Haines rowed with the first eight on Monday afternoon. By rowing at master stroke (as the Varsity shell) Bill was able to detect many faults that he could correct next time.

On April 10 the Varsity eight will have the noted New York eight visiting the Hangar and there will be a good test of the eight-oared crew. It is probable now that the season will start early.

The Varsity eight this year is a very strong team and is composed of the nine who have been training the past winter.

**Fencers Score Decisive Victory**

Over Dartmouth Delegation 11-2

Engineers Win Every Boat With The Epée—Lost But Two With Fools

Taking every heart with the cog and not one losing but two with the sword, the Engineers rowing team decisively defeated Dartmouth II to II in a combined rowing and open steamer in north harbor Boston yesterday afternoon.

The Engineers once again showed the world that there is no such thing as "equation" when handling the sword, and none of the engineers were defeated by the rower, in the first or second event.

The second event of the Green was the hardest adversary, for the engineers won both on 10.4. Let us give the Engineers a hearty "Way to go!" for eliminating Dartmouth in good measure.
