STEAM PISTON T. S. SUBSISTENCES

Physical Director Gives View On
Sign By Saturday

Reports from the offices of the Physi-

cal Director, S. J. Johnson, that no in-

terest is being shown in the sign up

ning of students in the freshmen

and sophomore classes, indicate that the

register of students in both classes will

be closed after May 1st. In writing to the

students in the two classes last week

the Director stated that the sign up

for juniors will open at 10 o'clock on

Saturday, May 2nd, and will continue

until 4 o'clock that afternoon. The

sign up for seniors will be held on

Saturday, May 9th, beginning at 10 o'clock

and concluding at 4 o'clock. The

sign up for all other classes, except the

senior class, will be held on Thursday,

May 7th, from 10 o'clock to 4 o'clock.

T. E. N. Goes on Sale

This Morning in Lobby

The March issue of the T. E. N. will go

on sale this morning in the main

lobby, according to Assistant Bursar

D. L. Carlu, of the Architecture

Department, who announces that
good interior and a soft exterior. To

Architects Delegated to Draw

Up Plans for Future Developments

As yet no definite plans have been

taken by the Corporation in disposing of

the farm land on the other side of Massa-

chusetts Avenue. It is very improbable

that any large developments will be

made on this property. The Board of

Trustees, in its recent meeting, has

voted to authorize the Architects

Delegated to Draw Up Plans for Future

Developments to submit plans for

the entire modern, four-storied, fire-proof,

building. The entire area of

the property is being carefully

planned, and in addition to the

main building a number of

additions and alterations will be

made to the present structure.

H. P. Jones, of the

Architectural Department, has

been delegated to prepare plans for

the construction of a new

building, which will be

located at the present site

of the present structure.

The entire area of

the property is being carefully

planned, and in addition to the

main building a number of

additions and alterations will be

made to the present structure.
