News of the Month

The present Managing Board feels sure that the student body 
will join them in wishing the new board a most successful year.

RIN OUT THE OLD

THERE comes a time in the life of every volume of THE TECH 
when it is necessary to change management, and the members of the Managing 
Board must watch the new Board proceed with the tasks that they have 
been busy preparing for since last October. It must be remembered that the 
Board of Volume XLIV announces that this is the last issue under their 
regimen.

Starting with the new term, the management of THE TECH 
will be in the hands of the Managing Board of Volume XLIV. The present 
Managing Board feels sure that the student body joins them in wishing the 
new board a most successful year.

CHEATING

With each set of examinations, there occur a few who try to cheat. Their work (
and the term) is being accomplished by cheating by which they are unable to do honor-
able and honest work. Although the practice is by no means an isolated instance of dis-
honesty, it still remains scattered and isolated. Students are not averse to cheating 
when there is a chance of it and are never afraid to try it. The Institute would be 
a great deal more ruthless if it did not occur at all.

It seems scarcely worth while enumerating again the argu-
ments against cheating. They are known to every one before he 
leaves his preparatory school. The moral side of the question has been stressed by the 
teacher since kindergarten days. We shall pass over this phase lest we bring up arguments that have by no 
means ceased to be a subject of interest. Now that every one has studied the subject, 
the fact thoroughly drilled into him that cheating harms only 
the student himself and that rectitude is the keynote of Engineering.

The present Managing Board feels sure that the student body 
will join them in wishing the new board a most successful year.

CHEATING

THE UNIVERSITY OF CHICAGO, through the benefaction of John D. Rockefeller, Jr., 
has set aside a fund of $10,000,000 to be used for the erection 
and maintenance of a new building on its present site in the 
southwest corner of the quadrangle. When complete the chapel 
will accommodate some 1,000 persons and the services will be 
conducted by a rector and a curate. A cornerstone was laid 
before the students of the University last October.
