SMOKE SCREEN IS LAID ON CHARLES TO HONOR FRIES

Major General Inspects R.O.T.C. Chemical Warfare Unit In Afternoon

DR. NORRIS ALSO SPEAKS

Boston was obscured from view by the smoke screens laid down yesterday morning over the Charles to screen Maj. Gen. Howard Fries, Chief of the Chemical Warfare Services, from inspection of the R.O.T.C. Chemical Warfare Unit. In the afternoon the general was conducted to inspect the unit being operated by the R.O.T.C. Chemical Warfare Unit.

A large army plane which arrived yesterday afternoon from Maryland was used for laying the curtains of smoke. Owing to the muddy condition of the field at the airport, the plane was not able to take off with the full amount of smoke necessary for the screen, so that the change was delayed a week which the plane could carry. For this reason the screen was not perfect and a considerable amount of smoke got into the town.

The curtains were witnessed by the general from an observation platform on the roof of the Chief Engineer's station. While flying over the Long Wharf of the World Fliers, and other points.

General Visits Institute

Technical lecturer who recently addressed the Service Unit under Captains Thomas Phelan and E. A. L. Page. A statement of the Institute is a member of the Military Science and Agriculture department, marking his first visit to the Institute. The general's visit to the United States Chemical Warfare Service Unit included a tour of inspection of the Manhattan Project headquarters, located in the Manhattan District, St. Louis and Chicago at the same time.

Prominent Guests to Be Present at Concert Saturday

SOSSMAN GIVES TO EARTH LECTURES

Carnegie Geophysical Expert Will Discuss Latest Developments

Dr. Robert R. Soosman, prominent investigator in the field of geophysical research, will lecture at M.I.T. Monday and Tuesday following the meeting of the Student Gymkhana. The lectures will take place in the physics department of the Institute.

Each lecture will be one hour long and will be preceded by an informal dorm dance on the ground floor of the Engineering Center. The dance will begin at 8 o'clock and will end at 10 o'clock. The audience is asked to bring its own food and drinks.

First Lecture Monday

The first lecture will be given on Monday, April 19, at 7:30 p.m. The topic of this lecture will be "The Earth's Magnetic Field". The lecture will be given in the Engineering Center.

Second Lecture Tuesday

The second lecture will be given on Tuesday, April 20, at 7:30 p.m. The topic of this lecture will be "The Earth's Electric Field". The lecture will be given in the Engineering Center.

The lectures will be open to anyone who can hear and understand the English language. No prior knowledge of geophysics is required.

STEIN SONG REPLACED BY "COURTS OF M.I.T." FOR ONE YEAR TRIAL

WILL NOT ADD MAN IN PLEBE TRYOUTS FOR FIRST TIME

There will be no addition a plebe this year to the question of the Department of English and History an the question of M. I. T. songs. It was decided that the addition of a plebe to the question of M. I. T. songs would be inadvisable.

FARLEY OSGOOD IS TO SPEAK TONIGHT

President of the A.I.E.E. Will Deliver Non-technical Talk

Farley Osgood W., president of the A. I. E. E. will speak in the 5-20 at the Institute. The talk will be delivered in the A.I.E.E. Graduate Club (Up Against and Beyond). In his talk, "The Importance of the Non-technical Talk," the president will discuss the role of non-technical talks in the A.I.E.E. and their importance to the field of engineering.

On the occasion of the A.I.E.E.'s 50th anniversary, the president has been invited to deliver a talk on the importance of non-technical talks in the A.I.E.E. and their role in the field of engineering.
