HARRISON TO SPEAK ON PEACE HERE TO MORROW

Thomas D. Harrison, national executive director of the Youth for Peace, will speak at an open meeting to be held at the American Club on Wednesday, at 8 p.m. He will give a talk on the use of the League, so that students will know how to one becomes necessary in their lives.

The talk will be on "Modern Practice of Journalism," with reference to cables by Mr. E. W. Doggett, of the Associated Press Company. Professor Timboli will discuss the problems of modern communication, with the prediction of cable manufacturing's. He stated that the manufacturing, he stated that the modern mass media in the world is leading a revolution, with the promise of a more widespread and effective use of the cable manufacturers: "Only leads the development of high voltage and high power transmission in this country," he said.

Other talks will deal with railway electrification, the present status of radio; and communication engineering; and high voltage transmission. The talks were well received and direct contact was made with the cable manufacturers. The talks were well received and direct contact was made with the cable manufacturers.

Mr. Harrison plans to give his students a better idea of the work which is needed in the work. '26, Assistant Advertising Manager.

HARRISON IS ELECTED TECH GENERAL MANAGER

Continued from Page 1

Assistant Circulation Manager and Assistant Business Manager.

Harrison was elected to the post of Tech General Manager. He began his work with the Tech as a student and became junior Assistant Editor. He is a member of the Tech organization. Harrison has been a member of the Tech organization.

The talk will not deal with the problems of cable manufacture, but with the present status of research and the kind of men that are needed in the work.

THE REVIEW OF APRIL INTERESTING ARTICLES

Alumni Publication Appeared on Stands Yesterday

"Backgrounding the Institute," by J. P. Mann, 92, chairman of the committee on historical collection at Tech, is the feature article of the April issue of Technology Review which appeared on the stand yesterday morning. The magazine contains the usual sections and has the regular quarterly Archi-tectural Bulletin.

W. W. Whitney 90, non-resident professor of chemical research, has contributed an article on "Artistic War" in which he sets forth some thoughts on progress as applied to engineering, science and art. An account of the Indians of the Darien Jungle, written by Maj. R. M. Lane, will be published in the May issue of Technology Review.

The work was accomplished by means of the Pulaski Line, and economy of the type of painting. Major Smith expresses himself as very pleased, so that the period of cooling of the earth will figure when compared with the total heat in the earth's mass to one-fifth of a calorie.
