Since 1871

THE BUYERS of du Pont explosives get something more than a commercial product.

Back of every pound of du Pont is the knowledge and experience gained during 122 years of explosives manufacturing. To consumers, this long experience means explosives that insure better blasting results at lower cost.

Uniformity of quality obtained through complete chemical control in every stage of production from raw material to finished product has made du Pont explosives standard throughout the world.

Send for the "Blasters' Handbook"—an authoritative work describing the practical methods of using explosives in every field.

It's a valuable reference for your guidance. Mention this publication when asking for the "Blasters' Hand-book."
