TRIP TO WEYMOUTH
BY E. E. SOCIETY
Bus To Take Students To Visit Unique Features of the Edison Plant

This afternoon the members of the Electrical Engineering Society will make a visit to the Weymouth Electric Illuminating Company of Boston. The trip will be made by buses which will leave in front of the Great Hall, at 3. The buses, according to Dr. W. H. James, will be delayed, and it is hoped that the company will present each student with an account of the station, and will function as a true report on the generating plant in the New England network.

Among the unique features of the station is the 1200 pound turbo-generating unit. The unit is a modification of the conventional cross-drum Babcock and Wilcox type. The turbine will operate at 3000 r. p. m. and is of bent-leaf, cross bearing design.

In conclusion the trip is scheduled for about the four o'clock hour. It may be obtained from any sports manager or at the A.A. office at 8:30 p.m.

CHEMICAL SOCIETY
Elections for next year's officers will be held Friday, May 15.

PLANNING TO CUSTOM, THE TCA. is planning to be represented at the upcoming annual college conference to be held at Silver Bay, on Saturday, June 13 to 15. Although the trip is 275 miles from Boston, and a large delegation from the college, the executive committee has voted to send the usual five delegates to the conference.

Awards and Banquet

At the Annual Meeting of the Varsity Management League, to be held tomorrow at 6.30 o'clock in the Alumni House, Walker, Captain P. G. Stuart John '26 or 'Joel Tompkins '26, will be the speaker of the afternoon. H. M. McWowran '21, the new member of the advisory council, who takes the place of H. P. Eddy, Jr., will be introduced and will pay a short address.

The evening session of the meeting will be devoted to the Banquet and the officers of the company will be present for the entertainment of the guests. The banquet may be obtained from any sports manager.

AUXPIECE TO DRAW LOTS

The components of the Aerostation Society will be divided into two main groups, and each group will consist of ten members, with the remaining five on the Combined Professional Society.

The afternoon's session will be devoted to the drawings by the company for the annual float trip to Silver Bay Conference, to be held at Silver Bay, on Saturday, June 13 to 15. Although the trip is 275 miles from Boston, and a large delegation of students and alumni from the college, the executive committee has voted to send the usual five delegates to the conference.
