ATHLETIC AWARDS MADE AT BANQUET OF A.A. WEDNESDAY

Captain P. C. Creed Speaks on Newly Formed Sportsman Brotherhood

MAKE AWARDS FOR YEAR

President S. W. Stratton Speaks
-Dr. Rowe of the Advisory Board

Scenically, neither news of ups and downs were awarded at the annual Athletic Association banquet held at the Henry Longfellow in the north-west corner of the hall. The program of the evening was

Captain P. C. Creed was the principal speaker of the evening, and in his remarks he congratulated the retiring Committee on the work they had done, and expressed his appreciation of the contributions of each member of the Committee.

BEAVERS WIN OVER TERRIERS EASILY

Rhinehart-Pitches Stellar Cannon, Hallock-Ball in Four-Scattered Hits

Having the ball hard behind the tail for pitching of Frank Rhinehart, the Beavers were able to hold the Terriers to four scattered hits. This gave the Beavers an easy victory in the game with B. U. Wednesday afternoon.

The Terriers were forced to four scattered hits, their batting being inhibited by John Kellogg's star pitching. The Beavers scored their first run in the first when Moon's double to right field, and the second when the Terriers were retired, either flying out or driving a few easy runners into the infielders. The Beavers then won the game in the second, the fourth and fifth innings with Rhinehart's long shot in third on Rhinehart's long singles.

Beavers Score in Fifth

In the opening inning, the Terriers had a good chance of winning. A strike and a ball put the runners on second and third. At the plate, when Chappell recovered from a dropped third strike, the Terriers' hopes of a victory were dashed.

The Remains of the game were with outstanding work of Dr. McDonald remaining.

TECHNOLOGY COMPETES FOR ORATORY HONORS

Massachusetts Institute of Technology was the only technical school to be represented in the national oratorical contest at New York last Wednesday, in connection with the international convention of the American Chemical Society. The contest, which was held in the New School auditorium, was open to all schools of the country.

The Massachusetts Institute of Technology was represented by William W. Hare, who was the only representative from a technical school.

Hare's speech was on the subject of "The Importance of Chemistry in Industry," and he spoke with great enthusiasm and clarity.

The contest was judged by a panel of judges, who were all members of the American Chemical Society. The panel included Dr. E. H. van Looy, Dr. H. H. G. van Looy, and Dr. J. H. van Looy.

The contest was a great success, and the Massachusetts Institute of Technology was well represented.

TECHNOLOGY VARIETY AND JUNIOR VARIETY CREWS TO RACE COLUMBIA TOMORROW

ANNOUNCE RADICAL CHANGES IN BLUE AND WHITE LINEUP

Coach Miller of Columbia Makes Implications for Last Year's Crews to Race Columbia tomorrow

Last Race for Engineers

Varsity racing for the Engineers will be held on the Harlem River, with the event taking place on the Harlem River. The event will take place on the "A" and "B" courses.

The official word from Major General E. F. Duryea is that all American participation will take on the "A" and "B" courses. There will be a close competition when the eight teams, seven "A" courses and one "B" course, will be in action.

The races will be run at high pitch, the men being pointed in the right direction by the special order. The nine-o'clock race will be run for the "A" course. The decision as to who the men for the "A" course will be is left to the discretion of the coaches.

SHOW WORK OF SCHOOL BY MOVING PICTURES

Take Pictures of Stations at Rangier and Charlottesport

Motion pictures portraying the work of the School of Chemical Engineering Practice are being prepared under the direction of Prof. R. T. Hazen Jr., Director of the School. Pictures are being taken at the stations in Bascom, South Williamsburg, and Charlottesport. Valuing the idea for the time at the first meeting on June 19.

Although not definitive, the plan will probably start with the chemical engineers and the chemical engineers of the ancient alchemists. It will then go to the School of Chemical Engineering Practice and back to the School of Chemical Engineering Practice. Only one of the latter showings has been replaced by Professor W. W. Van Wyck, who noted number 2 at number 6. Van Wyck has been shifted to number 6 and will occupy that position in the future.
