Professor Jackson Explains New
System to be Used in Course VI

"To bring the students into more in-
depth study, we have added this new
system to our curriculum," Professor
Jackson explained. "This will allow us
to give them the same advantages that
the traditional system offers, along
with the benefits of the newer tech-
iques. The aim of the electrical En-
gerineering Department is to pro-
vide the students with a broader
perspective on the field."
