John Hays Hammond Declares That Engineers Are Usually Underpaid

Suggests Co-Operation Would Alleviate Attention to Some

(Continued from Page 2)

the inspiring efficiency of the engineering profession, we may have to place on the shelf years of disparagement.

Indeed, the faculty should be filled more by engineers, because the latter, were to persevere under their regime. The "successful co-operative engineer" was to be made more of a co-operative engineer. The successful engineer should be in a position to

One of the troubles with the engineering profession is the determination of the case to the present situation in the matter of compensation. The most of the great projects of today depend upon the cooperation of the engineer and society. The engineer should receive just reward, according to current standards of achievement. As in the present system, we see a gentleman's agreement between men of wealth and institutions, and knowledge and expertise, in order to keep things in perspective.

In closing, Mr. Hammond stated the need of engineers and scientists more than ever before: the increasing power, of nations, powers of imagination, being a factor. It is an essential element of success.

FOREIGNER DISLIKES ATTENDANCE SYSTEM

(Continued from Page 3)

"I fail to see how the average foreign student can escape the college of his home town. He never.

But let me tell you a secret. This is not the place for the foreigner. They are unaccustomed to the life. They are unaccustomed to the pace. They are unaccustomed to the work. They are unaccustomed to the language. They are unaccustomed to the climate. They are unaccustomed to the food. They are unaccustomed to the customs. They are unaccustomed to the people. They are unaccustomed to the institutions. They are unaccustomed to the life. They are unaccustomed to the work. They are unaccustomed to the language. They are unaccustomed to the climate. They are unaccustomed to the food. They are unaccustomed to the customs. They are unaccustomed to the people. They are unaccustomed to the institutions.

There is a tremendous need for the foreigner. They are unaccustomed to the life. They are unaccustomed to the pace. They are unaccustomed to the work. They are unaccustomed to the language. They are unaccustomed to the climate. They are unaccustomed to the food. They are unaccustomed to the customs. They are unaccustomed to the people. They are unaccustomed to the institutions. They are unaccustomed to the life. They are unaccustomed to the pace. They are unaccustomed to the work. They are unaccustomed to the language. They are unaccustomed to the climate. They are unaccustomed to the food. They are unaccustomed to the customs. They are unaccustomed to the people. They are unaccustomed to the institutions.

NOTICES AND ANNOUNCEMENTS

OFFICIAL DEPARTMENT OF PHYSICS

Courses 31-33 in Knowledge of Popular Science will be given in room 202 in the Mechanical Engineering Building. Students planning to take these courses are to register on Tuesday, October 23, at the T. C. A. office. T. C. A. will send out cards for these courses, which will be given during the second term by Professor DeDonder of the University of Chicago. Students interested are asked to register.

PHYSICAL TRAINING

All freshmen are eligible for a physical education course for sport. Physical Education classes meet on Monday, Wednesday, and Friday from 4 to 5 on Mechanical Engineering Building, room 202. Students planning to take this course are to register on Tuesday, October 23, at the T. C. A. office. Tickets for these dances, which will be given on Thursday and Friday, may be obtained at the T. C. A. office. Prices are not high.

There will be a meeting of all men interested in the course in the Mechanical Engineering Building on Tuesday, October 23, at 5.

MECHANICAL ENGINEERING SOCIETY

A meeting of the governing board of the Mechanical Engineering Society will be held today in room 300.

ROXY BALLY

There will be a meeting of all box candidates in the hangar tomorrow afternoon at 3, and as yet no co-eds have been selected. The co-eds are made up of the boys who will be selected at 3, and as yet no co-eds have been selected. The co-eds are made up of the boys who will be selected at 3, and as yet no co-eds have been selected. The co-eds are made up of the boys who will be selected at 3, and as yet no co-eds have been selected. The co-eds are made up of the boys who will be selected at 3, and as yet no co-eds have been selected.

VOO DOO ISSUE WILL BE PUT OUT BY GIRLS

Voo Doos, in the next issue, will present to its readers a magazine entitled co-ed for a staff of girls. Composition is open to girls from all over the country, and it is expected that the issue will be entirely the work of them. Girls in the past have been the best part of the work.

Voo Doos are going out for the team. It will be necessary to sign up with the manager of the sport they are going out for, that it will be sufficient.

ALL MEETINGS WILL BE HELD IN ROOM 300 EXCEPT THE ONE OF 50, WHERE MEETING WILL BE HELD IN ROOM 301.

SPEAKING OF THE COLLEGIATE SHOP!

There is a great gulf between the average haberdashery and an establishment like the Collegiate Shop.

It is the difference between an every-day stock of merchandise, and carefully chosen, really worth-while, if necessary.

If every article that we sell has been selected for its exclusiveness, style appeal, and quality, and yet our prices are not high. At present we are showing a remarkable selection of ties, blotter paper, hostess flowers—everything in desirable furnishings for the younger man.

We have a most attractive proposition to make to the student—one that will prove extremely profitable—just a generous offer to pass along to friends.

Simplex Wires and Cables, insulated with rubber, paper or varnished cotton, and carefully selected for its worth, is a remarkable selection of merchandise, and carefully selected for its worth.
