Funds to be Used for Increasing the Salary of E. E. Departments

More Recommendations Made By Advisory and Visiting Committees

Appealing in the report of the Corporation Which recommendation is also one of the largest of the type was made by the Advisory Committee recent sessions of the Corporation at the annual meeting of the Corporation was held in the Brownstone of the Institute. It was a recommendation that a sum of $75,000 be donated to the Institute for the purpose of increasing the salary of the E. E. Department.

The gift was followed by the suggestion that the committee should be allowed to increase the sum if necessary, and that the amount be made available for the purpose of increasing the salary of the E. E. Department.

THE TECHNOLOGY REVIEW

"TOMMY BROTHERS" TITLE OF BOOK SELECTED BY SHOW

By Advisory and Visiting Committees

Among the many recommendations made by the Advisory and Visiting Committees, one stands out as particularly noteworthy. This recommendation was made in the report of the Corporation at the annual meeting of the Corporation. It was a recommendation that the title of the book, "Too Many Brothers," be changed to "Tommy Brothers." The committee felt that the title was more fitting for the story and would be more appealing to the general public.

The recommendation was made after careful consideration of the entire manuscript and the characters involved. The committee felt that "Tommy Brothers" was more appropriate for the story and would attract a wider audience.

DEGREES MADE FOR DEGREES

Fifty-Five Bachelor's, Eleven Master's and Two Doctor's Degrees

At their recent meeting held recently, the Faculty voted to award five Doctor's Degrees, two Doctor's Degrees, and forty Doctor's Degrees in various fields.

The degrees were awarded to students who had completed their studies and met the requirements set forth by the faculty. The degrees were awarded in fields such as chemical engineering, electrical engineering, mechanical engineering, and civil engineering.

The students who received the degrees were awarded based on their academic achievements, research contributions, and contributions to the field. The degrees were awarded to students who had demonstrated exceptional ability and dedication in their studies.

The Faculty was pleased with the accomplishments of the students and congratulated them on their achievements. The Faculty was confident that the students would continue to contribute to their fields and make a positive impact on society.

PLAY WRITTEN BY J. B. GOLDBERG AND R. A. ROTHSCILD

Both Men Are Seniors and Are Members of the Staff

TRIALS ON NOVEMBER 4

Julian B. Goldberg and Richard A. Rothschild, both members of the Science and Engineering Staff, were tried for their participation in the book show for Tech Show 1926. Mr. Goldberg, who was the chief speaker at the show, was found guilty, and was fined $1,000. Mr. Rothschild, who was the chief organiser of the show, was found not guilty, and was released.

The trial took place in the University Court and was presided over by Judge W. H. Scott. The trial lasted for three days, during which time both defendants were questioned extensively. The defendants were found guilty of violating the rules of the University Court, and were sentenced accordingly.

The defendants were found not guilty of violating the rules of the University Court, and were released.
