THE TECH

The TECH Book List—

The following books have been selected by the editors of this publication as being of interest and/or value to the students of MIT. All copies of the books have been read by one or more members of the Editorial Board. The selection is based on the judgment of the editors and is not intended to be exhaustive. Copies of these books are available at various prices from the Library of Congress, and from many bookstores.

THE MIRACLE

To a survived and exhibited audience, the author of this book, who is a member of the editorial board, has compiled a list of miracle stories that have been reported in the press of the year 1913. The book is written by a man who has a good deal of knowledge of history and current events, and who has devoted a great deal of time to the study of miracles. The book is divided into three parts: I, II, and III. Part I is an introduction, Part II is the main part of the book, and Part III is an appendix.

The book is written in a style that is easy to read and understand. The author has used a great deal of research in compiling the material for the book, and has taken pains to make it as accurate as possible. The book is well-organized and easy to follow. The author has also included a list of references at the end of each chapter, so that the reader can check the accuracy of the information.

The book is available for sale at the MIT Press, and is also available through most bookstores. The price of the book is $5.00, and it is well worth the money. It is a valuable addition to any collection of miracle stories, and is a must for anyone interested in the study of miracles.
