CONCERT TONIGHT BY MUSICAL CLUBS
Affair is at Edison Club on Massachusetts Avenue

Robert E. Patterson, Secretary and Manager of the Concert tonight at the Edison Club. A musical composition for the University of Michigan by Dr. Charles R. Brown of the Department of Pharmacology will be the feature of the program. The concert will begin at 8 o'clock.

FRATERNITIES SEND MEN TO CONFERENCE

Two Technology men attended the national Undergraduate Brotherhood conference which was held at the Hotel Pennsylvania, New York, November 27 to 28. The Technology fraternity representatives were A. W. Novembrer 27 and coatclled by "Dohi" Eisenman. They were most enthusiastic about the conference and were impressed by the methods of other colleges.

LECTURES GIVEN IN HEALTH EDUCATION

By Dr. John C. Epperly, Professor of Physiology.

First of the series of lectures on "Mental Endurance," the second one given at the Georgia School of Technology was given by Dr. John C. Epperly, Professor of Physiology. The lecture was attended by many students and was well received.

INTELLIGENCE OF AMERICAN STUDENTS

Dr. John C. Epperly, Professor of Physiology, delivered the second lecture in the series on "Mental Endurance," the Georgia School of Technology. The lecture was well received by the students present.

Nurses, aides, and supervisors.

Field. The course is intended to provide a program which will do for students of unusual ability, what it is intended to do for students of average ability. It is a program which will bring the students into the classroom and make them think and work. The course is a program of independent intellectual and original thought. It is to be taught by the best teachers we can find and the students will be given an opportunity to express their own ideas in the classroom.

The problem is one which is left as an open question for discussion, but it is one which has long been studied by English and Continental educational theorists. The course of study which frankly distinguishes between the student who is college material and the student who is not. It is a better solution for our educational system than the present because it helps the student to make up his own mind about what he wants to do. It is a solution that is more in the nature of a policy than an educational device.

BOYS' WORK SERVICE CONDUCTED BY T.C.A.

Under the direction of A. J. Beeckman, '27, the T.C.A. has established a branch of service known as Boys' Work. This branch is devoted to three purposes: first, to provide a group of well organized boys' clubs; second, to establish a boys' club in every city; and third, to establish a boys' club in every state. The T.C.A. is working on a plan for the establishment of a boys' club in every state. The T.C.A. is working on a plan for the establishment of a boys' club in every state.

An example of the boys' clubs established by the T.C.A. is the Boys' Club of the University of Michigan. The Boys' Club of the University of Michigan is one of the most successful boys' clubs in the country. The Boys' Club of the University of Michigan is one of the most successful boys' clubs in the country.

A great many engineers have been working on the problem of the German university system. The problem is one that has long been studied by English and Continental educational theorists. The course of study which frankly distinguishes between the student who is college material and the student who is not. It is a better solution for our educational system than the present because it helps the student to make up his own mind about what he wants to do. It is a solution that is more in the nature of a policy than an educational device.
