CAMBRIDGE MAIL IS HANDLED IN HANGAR

For the second year the hangar is the national nerve center for the Navy's campaign against the North. The hangar in which is now being built will be encased in concrete and a thick iron plate, and will be made to withstand the elements. It is expected that the hangar will be ready for use by the end of the year.

How to Keep Warm on These Cold Mornings

A talk on Reding's "The World's Largest Aircraft" will be given by Dr. J. H. Reding on Thursday, January 14, at 4:30 p.m. in the Great Hall of the Institute. The talk will be followed by a discussion.

PLAN LARGE STRUCTURE

With many members and guests present, the New York Club, which was founded in 1902, is now occupying its new building on Winter Memorial. The building, which was completed a few months ago, is a fine example of modern architecture.

Show Projector Capable of Use in the Daylight

In the course of his talk, Dr. J. H. Reding will show how an electric motor can be used to drive the machine in the daylight. The machine is placed between the projector and the audience, the picture being thrown on the screen in the daytime.

MAY GIVE ADDITIONAL COURSE ON CEMENT

On Tuesday, January 12, the School of Engineering will hold a special session on the subject of "Concrete Mixtures." The course will be given by Mr. W. E. Johnson, a member of the faculty.

STUDENTS WILL BE SPENT A CONSIDERABLE PART OF THE TIME IN THE LABORATORIES OF THE SCHOOL OF CHEMISTRY"

The course will be given in the laboratories of the School of Chemistry, and will be of an advanced type.
